Backyard Stargazing Night

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A clear summer night stargazing in the backyard: spreading blankets, lying on the grass, the dog squeezing in between the kids, spotting the moon and a sleepy end under the stars.

TIMELINE

0-5s	Blankets out
5-10s	Squeezing in
10-15s	Pointing at stars
15-20s	Moonlight sniff
20-25s	Sleepy stars

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle and pale cream-silver legs, chest and face (black and silver coloring), dark ears, gentle brown eyes, medium build, wearing a purple nylon collar with a small heart-shaped tag, natural slightly fluffy coat. 0-5s (Blankets out): Backyard at dusk, deep blue sky with the first stars, dim light from the kitchen window across the lawn, wooden fence. The mom, a woman in her mid 30s with shoulder-length brown hair, spreads two thick blankets on the grass. The dog walks across them immediately and sniffs every corner. Sound: crickets, blanket rustling, mom says "okay, everyone lie down". 5-10s (Squeezing in): Backyard at night, soft yellow porch light far behind, starry sky. The son, an 11-year-old boy with short curly hair, and the daughter, a 7-year-old girl with two braids, lie side by side on the blanket. The dog circles once and squeezes down right between them, head on the daughter's arm. Sound: crickets chirping, giggles, daughter whispering "she wants to see too". 10-15s (Pointing at stars): Backyard at night, dim porch light, dark sky full of stars above the fence. The dad, a man in his late 30s with a short dark beard, lies on his back pointing up at the sky. The dog lifts her head, looks at his hand, then up at the sky, ears perked toward a sound. Sound: crickets, distant dog barking, dad saying "see the Big Dipper?". 15-20s (Moonlight sniff): Backyard lawn at night, bright moon over the fence, faint light from the house windows. The dog gets up from the blankets and walks a few steps to sniff along the dark grass by the fence, tail swaying, then trots back and lies down again next to the son. Sound: crickets, grass rustling, a moth fluttering, son says "come back here". 20-25s (Sleepy stars): Backyard at night on the blankets, dim porch light, starry sky. The daughter has fallen asleep with one arm draped over the dog, who lies still with her chin on the blanket, eyes slowly blinking. The mom's hand reaches in to tuck a blanket over the daughter's legs. Sound: crickets, soft breathing, mom whispering "time for bed soon".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
