Lost Tooth Day

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Our daughter loses her first front tooth and the dog is there for all of it: the wiggle, the apple bite, the careful sniff, the pillow at bedtime and the morning surprise.

TIMELINE

0-5s	Wiggle check
5-10s	Apple bite
10-15s	Careful sniff
15-20s	Under the pillow
20-25s	Morning surprise

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle and pale cream-silver legs, chest and face (black and silver coloring), dark ears, gentle brown eyes, medium build, wearing a purple nylon collar with a small heart-shaped tag, natural slightly fluffy coat. 0-5s (Wiggle check): Kitchen table, morning daylight from the window, plates and juice cups on a checked tablecloth. The daughter, a 7-year-old girl with two braids, wiggles her loose front tooth with one finger and shows the dog. The dog sits beside her chair and tilts her head, staring at the girl's open mouth. Sound: girl says "look, it moves", a clock ticking, a soft dog snort. 5-10s (Apple bite): Same kitchen, morning daylight. The daughter, a 7-year-old girl with two braids, bites into an apple slice and stops, eyes wide, holding her mouth. The dad, a man in his late 30s with a short dark beard, leans in with a tissue. The dog's ears shoot up and she stands up beside the chair. Sound: apple crunch, the girl gasps "it came out!", dad laughs. 10-15s (Careful sniff): Kitchen, morning light, beige tile floor. The daughter, a 7-year-old girl with two braids, crouches and shows a tiny tooth on a folded tissue in her palm. The dog stretches her neck and sniffs it very gently. The dad's hand hovers close and quickly closes the tissue before she can lick it. Sound: sniffing, the girl giggling, dad says "don't let her eat it". 15-20s (Under the pillow): Kids' bedroom at night, a small bedside lamp switched on, warm ordinary indoor light, stuffed animals on the shelf. The daughter, a 7-year-old girl with two braids, slides a small plain envelope under her pillow. The dog stands with her front paws on the rug, sniffing the pillow edge curiously. Sound: sheets rustling, sniffing, mom whispers "lights out soon". 20-25s (Morning surprise): Same bedroom, early morning, pale daylight through the curtains. The daughter, a 7-year-old girl with two braids and a gap in her smile, sits up and lifts the pillow, holding up a shiny coin. The dog jumps up beside the bed, tail wagging, and sniffs her hand excitedly. Sound: girl squeals, tags jingling, excited panting, mom says "she came!".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
