# The Kids Build Her a Cardboard House

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

## VIDEO IDEA

A new fridge arrived in a huge box and the kids turn it into a house for the dog: dad cuts the door, the kids decorate, a blanket goes in, the first look inside and the new tenant.

## MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle and pale cream-silver legs, chest and face (black and silver coloring), dark ears, gentle brown eyes, medium build, wearing a purple nylon collar with a small heart-shaped tag, natural slightly fluffy coat. 0-5s (Cutting the door): Garage, Saturday afternoon, open garage door letting in overcast daylight, a big brown cardboard box on the concrete. The dad, a man in his late 30s with a short dark beard, cuts a door shape in the side with a box cutter while the kids hold the box steady. The dog watches from a few steps away. Sound: cardboard ripping, kids talking excitedly, dad says "hold it still". 5-10s (Decorating): Same garage, overcast daylight. The daughter, a 7-year-old girl with two braids, and the son, an 11-year-old boy with short curly hair, kneel and color big hearts, paw prints and a crooked window on the box with thick crayons. The dog sniffs the crayon marks and pokes her nose at a crayon. Sound: crayons scratching, kids giggling, son says "no, that's not food". 10-15s (Blanket inside): Garage floor, afternoon daylight from the open door. The daughter, a girl with two braids, crawls halfway into the box and spreads an old fleece blanket on the bottom, then backs out. The dog pushes her head in next to the girl to see what she is doing. Sound: cardboard creaking, blanket rustling, girl says "it's cozy now". 15-20s (First look): Garage, overcast afternoon light, the decorated box with a cut door. The son with short curly hair taps the floor of the box. The dog sniffs around the doorway, steps inside with her front legs, then her back legs, and the whole box wobbles as she turns around. Sound: box creaking, paws on cardboard, kids holding their breath and laughing. 20-25s (New tenant): Garage, late afternoon, natural daylight. The dog lies inside the cardboard house with her head poking out of the door, ears up. The daughter with two braids peeks through the cut window on the side and the son with short curly hair crouches at the door, both grinning. Sound: kids cheering quietly, tail thumping on cardboard, dad says "she moved in".

## AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

## CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

#### HOW TO MAKE IT LOOK REAL

| | |
|---|---|
| **Use a real photo** | Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips. |
| **Muse AI: one video** | Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts. |
| **Pick the most natural** | Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face. |
| **Keep the real sound** | Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath. |
| **No filters** | Do not add filters, slow motion or fancy transitions - real home videos don't have them. |
