Building a Birdhouse in Grandpa's Workshop

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The kids help grandpa build a birdhouse while the dog keeps an eye on things from her mat: measuring, hammering, sanding, showing off the finished birdhouse and hanging it in the yard.

TIMELINE

0-5s	Measuring
5-10s	Hammering
10-15s	Sanding

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle and pale cream-silver legs, chest and face (black and silver coloring), dark ears, gentle brown eyes, medium build, wearing a purple nylon collar with a small heart-shaped tag, natural slightly fluffy coat. 0-5s (Measuring): Grandpa's garage workshop, morning, daylight through a dusty window, a wooden workbench and tools hanging on a pegboard. The grandpa, a man in his early 70s, bald, wearing a flat cap, measures a pine board with a tape. The son, an 11-year-old boy with short curly hair, watches. The dog lies on a mat by the door. Sound: tape measure clicking, grandpa says "measure twice", birds outside. 5-10s (Hammering): Same workshop, morning window light. The grandpa, a bald man in a flat cap, taps small nails into the birdhouse roof with a hammer. The daughter, a 7-year-old girl with two braids, stands back watching with her hands behind her. On her mat by the door, the dog lifts her head at each tap. Sound: hammer tapping, the girl counting taps, a quiet huff from the dog. 10-15s (Sanding): Workshop, morning light, sawdust on the workbench. The grandpa, a man in his early 70s wearing a flat cap, sands the edges of the birdhouse with a sanding block. Fine dust floats in the window light. The dog, still lying on her mat, sniffs the air and sneezes. Sound: sandpaper scratching, a dog sneeze, kids laughing "bless you". 15-20s (Showing it off): Workshop doorway, late morning, natural daylight. The son, a boy with short curly hair, and the daughter, a girl with two braids, kneel by the dog's mat holding the finished plain wooden birdhouse. The dog sniffs the little round hole and the roof, tail swishing on the mat. Sound: sniffing, kids saying "we made it", tail swishing. 20-25s (Hanging it up): Grandpa's backyard, late morning, sunny with light clouds, an old apple tree. The grandpa, a bald man in a flat cap, hangs the birdhouse on a low branch. The son with short curly hair and the daughter with two braids stand back and clap. The dog sits on the grass beside them looking up. Sound: birds chirping, clapping, grandpa says "now we wait for tenants".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
