Training Like a Legend

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A normal morning at the working dog club filmed by the handler: jumping out of the car, focused heeling, a hurdle jump, a tug reward and a water break in the shade.

TIMELINE

0-5s	Arrival at the field
5-10s	Focused heeling
10-15s	Hurdle jump
15-20s	Tug reward
20-25s	Water break

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Arrival at the field): Gravel parking area next to a grass training field at a local working dog club, early morning, overcast soft daylight, dew on the patchy grass, chain-link fence and a white equipment shed behind. The dog jumps down from the open back of an SUV, lands on the gravel and immediately looks up at the handler's legs, tail low and steady, waiting. Sound: car door closing, gravel crunching, distant birds, handler says "ready?". 5-10s (Focused heeling): Same grass training field, overcast morning daylight, chain-link fence in the background. Camera held low at the handler's hip. The dog trots in heel position on the left side, head tilted up, eyes locked on the handler's face, paws landing softly on the damp grass as they walk a straight line together. Sound: soft paw steps on wet grass, handler's jeans rustling, collar tag clinking. 10-15s (Hurdle jump): Training field, overcast daylight, a low wooden hurdle painted white with chipped paint standing on the grass. The dog sits beside the handler's boots, then on a quiet cue runs forward, clears the hurdle in one easy bound, lands on the grass and turns back toward the camera at a trot. Sound: paws thudding on grass, light panting, handler says "hup". 15-20s (Tug reward): Same club field, overcast morning, worn grass near the shed. The handler's hand holds out a frayed jute tug. The dog grabs it with a full grip, pulls backward with his front legs braced, tail wagging hard, then lets go the moment the handler says out and sits again. Sound: tug fabric creaking, low playful growl, handler says "out" and "good". 20-25s (Water break): Shady spot beside the white equipment shed, overcast daylight, an old steel water bowl on a concrete slab. The dog laps water noisily, drops dripping onto the concrete, then lies down in the shade with his head up, panting and watching the empty field. Sound: loud lapping, water dripping, heavy panting, distant car passing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Arrival at the field

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Gravel parking area next to a grass training field at a local working dog club, early morning, overcast soft daylight, dew on the patchy grass, chain-link fence and a white equipment shed behind. The dog jumps down from the open back of an SUV, lands on the gravel and immediately looks up at the handler's legs, tail low and steady, waiting. Sound: car door closing, gravel crunching, distant birds, handler says "ready?".

Clip 2 | 5-10s | Focused heeling

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Same grass training field, overcast morning daylight, chain-link fence in the background. Camera held low at the handler's hip. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
