Search and Rescue Training Day

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A search and rescue practice day at an open meadow: putting on the search vest, the send-out, finding a volunteer behind hay bales, a tug reward and resting by the van.

TIMELINE

0-5s	Vest goes on
5-10s	The send-out
10-15s	Alert bark
15-20s	Tug reward
20-25s	Rest by the van

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Vest goes on): Edge of a large open meadow used by a search and rescue team, mid-morning, bright hazy daylight, a white van with open side door behind. The handler's hands buckle a plain orange search vest around the dog's chest while he stands still, ears up, staring out at the long grass ahead. Sound: buckle clicking, wind in the grass, handler says "we're working". 5-10s (The send-out): Same meadow, hazy mid-morning daylight, tall green grass with yellow wildflowers, a tree line far away. The handler's arm points forward. The dog bursts into a fast run through the grass, orange vest bouncing, and heads toward a row of round hay bales in the distance. Sound: grass swishing, paws pounding, handler says "search". 10-15s (Alert bark): Behind a row of round hay bales in the meadow, hazy daylight. A volunteer in a grey hoodie sits on the ground leaning against a bale. The dog stops a few steps in front of the volunteer, plants his feet and barks steadily, looking back and forth between the volunteer and the direction of the handler. Sound: repeated deep barking, wind, handler far away calling "good boy". 15-20s (Tug reward): Same spot by the hay bales, hazy daylight, straw scattered on the grass. The volunteer pulls a red rubber tug from a hoodie pocket and offers it. The dog grabs it and tugs with his whole body, tail high and swinging, while the volunteer laughs and holds on. Sound: volunteer laughing, rubber tug squeaking, playful growls. 20-25s (Rest by the van): Beside the white van at the meadow edge, late morning, hazy daylight, a folding camp chair and a blue water jug on the grass. The dog lies on a flattened cardboard sheet in the van's shade, vest removed, drinking from a collapsible bowl, then rests his chin on his paws. Sound: lapping water, van radio murmuring faintly, a long contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Vest goes on

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Edge of a large open meadow used by a search and rescue team, mid-morning, bright hazy daylight, a white van with open side door behind. The handler's hands buckle a plain orange search vest around the dog's chest while he stands still, ears up, staring out at the long grass ahead. Sound: buckle clicking, wind in the grass, handler says "we're working".

Clip 2 | 5-10s | The send-out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
