Finding the Hidden Volunteer

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A friend filmed a hide-and-find exercise in the woods: watching the volunteer leave, the release, air scenting, the find behind a fallen log and a ball reward.

TIMELINE

0-5s	Watching her leave
5-10s	Release and run
10-15s	Air scenting
15-20s	The find
20-25s	Ball reward

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Watching her leave): Mixed forest with a dirt path, late afternoon, overcast light filtering through the trees, brown leaves on the ground. The handler kneels holding the dog's harness. The dog stares hard down the path, body leaning forward, as a volunteer in a green jacket walks away between the trees and disappears. Sound: leaves crunching, soft whining, handler whispers "watch her". 5-10s (Release and run): Same forest path, overcast late afternoon light, damp brown leaves and roots across the trail. The handler lets go of the harness. The dog launches forward down the path at a full run, kicking up leaves, ears pinned back, and veers off the trail between two birch trees. Sound: leaves scattering, fast paw beats, handler says "find her". 10-15s (Air scenting): Open patch in the same forest, overcast afternoon light, ferns and moss on the ground. The dog slows to a trot, lifts his nose high into the breeze and sniffs rapidly, turning his head left and right, then suddenly swings toward a large fallen tree trunk. Sound: quick sniffing, a twig snapping, wind in the branches. 15-20s (The find): Behind a large mossy fallen log in the forest, overcast afternoon light. The volunteer in the green jacket sits on the leaves, hunched low. The dog stands on the other side of the log and barks steadily at her, tail stiff and wagging, not jumping over. Sound: loud steady barking, volunteer giggling quietly, birds flying off. 20-25s (Ball reward): Same spot by the fallen log, overcast forest light, leaves everywhere. The volunteer stands up and tosses a black rubber ball a short distance along the ground. The dog pounces on it, trots back proudly with the ball in his mouth and squeezes it, making it squeak. Sound: ball squeaking, volunteer says "you got me", handler laughing from afar.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Watching her leave

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Mixed forest with a dirt path, late afternoon, overcast light filtering through the trees, brown leaves on the ground. The handler kneels holding the dog's harness. The dog stares hard down the path, body leaning forward, as a volunteer in a green jacket walks away between the trees and disappears. Sound: leaves crunching, soft whining, handler whispers "watch her".

Clip 2 | 5-10s | Release and run

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
