Rubble Pile Search Practice

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Search practice on a purpose-built training rubble pile with stable blocks: careful footing, sniffing the gaps, an alert at the hidden chamber, coming down the ramp and a paw check.

TIMELINE

0-5s	Careful climb
5-10s	Sniffing the gaps
10-15s	Alert at the chamber
15-20s	Down the ramp
20-25s	Paw check

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Careful climb): Fenced search and rescue training site with a purpose-built rubble pile of large, stable concrete blocks and wooden pallets bolted in place, grey overcast midday light, gravel ground. The dog steps up the low end of the pile slowly, testing each block with his front paw before shifting his weight. Sound: claws scraping on concrete, wind, handler says "easy". 5-10s (Sniffing the gaps): On top of the stable training rubble pile, overcast midday daylight, grey concrete blocks with moss in the cracks. The dog moves along the blocks with his nose pushed into the dark gaps between them, sniffing deeply, tail level, pausing at each opening before moving on. Sound: deep sniffing, gravel trickling, distant road noise. 10-15s (Alert at the chamber): Middle of the training rubble pile, overcast light, a square wooden hatch built into the blocks where a volunteer hides inside a safe chamber. The dog stops at the hatch, plants all four feet and barks repeatedly down at it, ears forward, glancing toward the camera between barks. Sound: strong repeated barking, muffled voice from inside saying "good dog". 15-20s (Down the ramp): Side of the rubble training pile, overcast midday light, a wide wooden ramp with grip strips leading down to the gravel. The dog walks down the ramp at a calm pace toward the handler, who stands at the bottom holding a tug, and he takes the tug with a happy grab. Sound: paws thumping on the wooden ramp, tug fabric pulling, handler praising. 20-25s (Paw check): Gravel area beside the training pile, overcast daylight, a camping mat laid on the ground. The dog lies on the mat while the handler's hands gently lift each front paw and spread the pads to check for scrapes. The dog stays relaxed, licking the handler's wrist once. Sound: quiet breathing, handler says "all good, buddy", wind.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Careful climb

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Fenced search and rescue training site with a purpose-built rubble pile of large, stable concrete blocks and wooden pallets bolted in place, grey overcast midday light, gravel ground. The dog steps up the low end of the pile slowly, testing each block with his front paw before shifting his weight. Sound: claws scraping on concrete, wind, handler says "easy".

Clip 2 | 5-10s | Sniffing the gaps

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. The dog lies on the mat while the handler's hands gently lift each front paw and spread the pads to check for scrapes. The dog stays relaxed, licking the handler's wrist once. Sound: quiet breathing, handler says "all good, buddy", wind.

FACEBOOK CAPTION

Slow and careful wins on the rubble.
Paws checked, no scratches, very proud handler.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
