Tracking a Scent Trail Through the Woods

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A tracking session through pine woods on a long line: harness on, nose down at the start, stepping over a log, a sharp turn and finding the leather glove at the end.

TIMELINE

0-5s	Harness and line
5-10s	Nose down start
10-15s	Over the log
15-20s	Sharp turn
20-25s	Glove found

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Harness and line): Pine forest parking pull-out, early morning, cool misty grey light, pine needles on the ground. The handler's hands clip a long green tracking line to the back of a black tracking harness on the dog. He stands still, nose already twitching toward a small flag stuck in the ground. Sound: clip snapping shut, birds, handler says "ready to track?". 5-10s (Nose down start): Pine forest floor, misty early morning light, brown needles and low blueberry shrubs. The dog drops his nose to the ground right at the start flag, sniffs in short bursts, then moves forward slowly along an invisible line, the long green line trailing behind him. Sound: rapid sniffing, line sliding over needles, handler breathing. 10-15s (Over the log): Deeper in the pine woods, soft misty light between the trunks, a thin fallen tree across the track. The dog steps calmly over the log without lifting his nose much, continues sniffing on the far side, and the handler's hand lets the line slide through loosely. Sound: twigs cracking, line rubbing on bark, quiet forest. 15-20s (Sharp turn): Pine forest, misty morning light, a small clearing with mossy ground. The dog tracks straight, stops, circles once with his nose low, then turns sharply to the right and continues at a steady pace into the trees, line tightening in the handler's hand. Sound: sniffing, moss crunching, handler says "good, find it". 20-25s (Glove found): End of the track under a large pine, misty light, needles and a worn brown leather glove on the ground. The dog stops at the glove, lies down with it between his front paws and looks back at the handler. The handler's hand reaches in with a treat. Sound: treat pouch zipper, crunching, handler says "yes, good boy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Harness and line

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Pine forest parking pull-out, early morning, cool misty grey light, pine needles on the ground. The handler's hands clip a long green tracking line to the back of a black tracking harness on the dog. He stands still, nose already twitching toward a small flag stuck in the ground. Sound: clip snapping shut, birds, handler says "ready to track?".

Clip 2 | 5-10s | Nose down start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
