Retrieve Over the A-Frame Wall

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The retrieve over the A-frame climbing wall at the club: the throw, the climb up, the pick-up, the climb back and a straight front sit holding the dumbbell.

TIMELINE

0-5s	The throw
5-10s	Climbing up
10-15s	The pick-up
15-20s	Climbing back
20-25s	Front sit

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (The throw): Dog club training field, midday, bright sunny light, short grass, a wooden A-frame climbing wall with grip slats standing in the middle. The dog sits at the handler's left leg while the handler's hand throws a wooden dumbbell over the wall to land in the grass on the far side. Sound: dumbbell thudding on grass, handler says "wait". 5-10s (Climbing up): Same club field, bright midday sun, the wooden A-frame wall with grip slats. The dog runs at the wall, scrambles up the slanted side with his claws gripping the slats, reaches the top and pushes over in one smooth motion. Sound: claws scraping wood, a hollow knock, handler says "hup". 10-15s (The pick-up): Far side of the A-frame wall, sunny midday light, the wooden dumbbell lying on the short grass. Camera filmed by a friend from the side. The dog lands, trots straight to the dumbbell, picks it up cleanly by the middle bar and turns back toward the wall. Sound: paws on grass, wooden dumbbell clacking against teeth, birds. 15-20s (Climbing back): A-frame wall on the sunny club field. The dog runs up the slanted side holding the wooden dumbbell firmly in his mouth, hind legs pushing hard on the grip slats, crosses the top and climbs down the other side toward the handler. Sound: claws on wood, heavy breathing through his nose, friend says "wow". 20-25s (Front sit): In front of the handler near the A-frame, bright midday sun. The dog sits straight in front of the handler's boots holding the dumbbell still, looking up. The handler's hand takes the dumbbell on the out command and gives him a tug from a back pocket. Sound: handler says "out", tug pulling, happy growling.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
