Bark and Hold at the Blind

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Protection sport blind work with a professional trainer in a padded sleeve: running the blind, the bark and hold without touching, the handler's approach and a calm call to heel.

TIMELINE

0-5s	Waiting to go
5-10s	Running the blind
10-15s	Bark and hold
15-20s	Handler approaches
20-25s	Calm call to heel

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Waiting to go): Protection sport field at a dog club, early evening, cloudy sky with soft even light, a row of tall triangular fabric blinds on the grass. The dog sits at the handler's left leg, nose pointed at the farthest blind, muscles tense but still, waiting for the command. Sound: quiet field, wind flapping the fabric, handler says "steady". 5-10s (Running the blind): Same sport field, cloudy evening light, tall fabric blinds standing in a line. The dog sprints across the grass, rounds the far blind in a tight curve with his body leaning into the turn, and disappears briefly behind it, grass flying from his back paws. Sound: fast paw beats, fabric rustling, handler says "revier". 10-15s (Bark and hold): In front of a tall fabric blind on the sport field, cloudy soft evening light. A professional trainer in a padded sleeve and padded pants stands motionless inside the blind. The dog stands squarely in front of him and barks loudly and rhythmically without touching him or the sleeve. Sound: loud rhythmic barking, wind, trainer silent. 15-20s (Handler approaches): Sport field, cloudy evening light, camera walking toward the blind. The dog keeps barking steadily at the still trainer in the padded sleeve, never glancing away, as the handler's footsteps bring the camera closer and stop a few meters behind him. Sound: steady barking, handler's footsteps on grass, wind. 20-25s (Calm call to heel): In front of the fabric blind, cloudy evening light, trimmed grass. The handler says heel. The dog stops barking at once, turns and trots to the handler's left leg, sits, and looks up with his mouth relaxed and tongue out while the trainer stays still. Sound: sudden quiet, handler says "good boy", the dog panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Waiting to go

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Protection sport field at a dog club, early evening, cloudy sky with soft even light, a row of tall triangular fabric blinds on the grass. The dog sits at the handler's left leg, nose pointed at the farthest blind, muscles tense but still, waiting for the command. Sound: quiet field, wind flapping the fabric, handler says "steady".

Clip 2 | 5-10s | Running the blind

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Loud when he needs to be, quiet when I ask.
That switch is everything.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
