Scent Detection With the Scent Boxes

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Scent box practice in a community hall: the line of boxes, sniffing each one, the freeze and sit at the target box, the reward and a second round with the boxes shuffled.

TIMELINE

0-5s	Line of boxes
5-10s	Sniffing each box
10-15s	Freeze and sit
15-20s	Reward at the box
20-25s	Shuffled round

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Line of boxes): Community hall with a scuffed wooden floor, afternoon, daylight from tall windows plus ordinary ceiling lights, stacked plastic chairs against the wall. Six plain wooden boxes with holes in the lids sit in a row. The dog sits at the start, nose already working toward the boxes. Sound: hall echo, chairs creaking, handler says "find it". 5-10s (Sniffing each box): Same community hall, afternoon window light, scuffed wooden floor. The dog walks along the row of wooden boxes, pushing his nose into the hole of each lid, sniffing for a second and moving on, claws ticking on the wooden floor, tail swaying slowly behind him. Sound: sniffing, claws on wood, quiet echo. 10-15s (Freeze and sit): Community hall, afternoon daylight, six wooden boxes in a row. At the fourth box the dog stops, sniffs harder, then freezes with his nose pressed to the hole and sits down slowly, staying completely still without pawing the box, eyes fixed on the lid. Sound: intense sniffing, then silence, handler whispering "yes". 15-20s (Reward at the box): Same hall, window light and ceiling lights, scuffed floor. The handler's hand places a small treat right on top of the target box. The dog eats it and keeps his nose on the box, earning a second treat and a scratch behind the ears. Sound: treats crunching, handler saying "good boy, good find". 20-25s (Shuffled round): Community hall, afternoon light from tall windows, the wooden boxes now in a different order. The dog trots down the row quickly, sniffs only two boxes and sits hard at the right one, looking back at the handler with his ears forward. Sound: quick sniffing, handler laughing, "how did you do that so fast?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Line of boxes

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Community hall with a scuffed wooden floor, afternoon, daylight from tall windows plus ordinary ceiling lights, stacked plastic chairs against the wall. Six plain wooden boxes with holes in the lids sit in a row. The dog sits at the start, nose already working toward the boxes. Sound: hall echo, chairs creaking, handler says "find it".

Clip 2 | 5-10s | Sniffing each box

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Community hall, afternoon light from tall windows, the wooden boxes now in a different order. The dog trots down the row quickly, sniffs only two boxes and sits hard at the right one, looking back at the handler with his ears forward. Sound: quick sniffing, handler laughing, "how did you do that so fast?".

FACEBOOK CAPTION

He found the scent box in four seconds the second time.
Should we try a harder scent next week?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
