Night Tracking With a Headlamp

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A night track across a meadow by headlamp on a long line: gearing up, nose down in the beam, following the track, finding the article and heading back to the car.

TIMELINE

0-5s	Gearing up
5-10s	Nose in the beam
10-15s	Following the track
15-20s	Article found
20-25s	Back to the car

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Gearing up): Dirt pull-out next to a meadow, night, dark sky, the only light coming from the handler's headlamp. In the white headlamp beam the handler's hands clip a long line to the dog's harness, which has reflective strips. The dog stands still, breath visible in the cool air. Sound: crickets, clip snapping, handler whispering "let's track". 5-10s (Nose in the beam): Edge of the dark meadow at night, the headlamp beam lighting a circle of grass. The dog drops his nose into the wet grass at the start of the track and sniffs deeply, the reflective strips on his harness catching the beam. Sound: deep sniffing, crickets, wet grass rustling. 10-15s (Following the track): Dark meadow at night, headlamp beam bobbing ahead, tall wet grass. The dog moves forward steadily with his nose low, the long line stretching from his harness back to the handler's hand, and the beam follows his tail and back legs. Sound: handler's footsteps in grass, line swishing, an owl hooting. 15-20s (Article found): Middle of the dark meadow, night, headlamp beam on the grass. The dog stops and lies down, nose pointing at a small grey wool sock lying in the grass. He looks back into the beam, eyes calm, waiting for the handler. Sound: handler whispers "yes, good boy", treat crunching, crickets. 20-25s (Back to the car): Dirt pull-out at night, headlamp beam and the faint interior light of a parked car with the hatch open. The dog jumps into the back of the car onto an old blanket, turns around once and lies down, panting softly, grass seeds stuck to his legs. Sound: car suspension creaking, panting, handler says "night shift done".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Gearing up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Dirt pull-out next to a meadow, night, dark sky, the only light coming from the handler's headlamp. In the white headlamp beam the handler's hands clip a long line to the dog's harness, which has reflective strips. The dog stands still, breath visible in the cool air. Sound: crickets, clip snapping, handler whispering "let's track".

Clip 2 | 5-10s | Nose in the beam

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
