Emergency Stop on Command

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Practicing the emergency down at a distance on a fenced field: mid-recall stop, stop while chasing a ball, stop near a friend walking by, a recall from the down and a happy reward.

TIMELINE

0-5s	Mid-recall stop
5-10s	Stop during chase
10-15s	Holding the down
15-20s	Recall from down
20-25s	Ball reward

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Mid-recall stop): Large fenced grass field, late afternoon, sunny with a light breeze, tall poplar trees along the fence. The dog gallops toward the camera on a recall. The handler shouts down and he drops flat into the grass halfway, skidding a little. Sound: pounding paws, handler shouts "down", sudden quiet. 5-10s (Stop during chase): Same fenced field, warm late afternoon light, long shadows from the poplars. The handler throws a yellow ball and the dog sprints after it. Before reaching it he hears down and drops instantly, the ball still rolling ahead of him. Sound: ball bouncing, handler shouts "down", wind in the trees. 10-15s (Holding the down): Fenced grass field, late afternoon sunlight, the yellow ball lying still a few meters past the dog. He stays flat in the grass, head up, eyes on the handler, tail flat and still, ignoring the ball completely while a leaf blows past his nose. Sound: breeze, distant traffic, handler whispers "good". 15-20s (Recall from down): Same field, late afternoon sun, poplar trees behind. The handler calls the dog. He springs up from the grass and runs straight back to the camera, sits in front of the handler's sneakers and looks up, panting, waiting for the next cue. Sound: handler says "come", fast paw beats, panting. 20-25s (Ball reward): Fenced grass field, warm late afternoon light. The handler releases the dog toward the yellow ball. He races to it, scoops it up mid-run, and comes back prancing, squeezing the ball in his mouth with his tail swinging, kicking up bits of grass. Sound: handler says "get it", ball squeaking, laughing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Mid-recall stop

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Large fenced grass field, late afternoon, sunny with a light breeze, tall poplar trees along the fence. The dog gallops toward the camera on a recall. The handler shouts down and he drops flat into the grass halfway, skidding a little. Sound: pounding paws, handler shouts "down", sudden quiet.

Clip 2 | 5-10s | Stop during chase

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. He races to it, scoops it up mid-run, and comes back prancing, squeezing the ball in his mouth with his tail swinging, kicking up bits of grass. Sound: handler says "get it", ball squeaking, laughing.

FACEBOOK CAPTION

The most important command we know.
It might save his life one day, so we practice it every week.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
