Endurance Test Walk

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Practice for a working dog endurance test on quiet farm roads: trotting beside the bicycle, a water stop, trotting past a field, a paw check and resting in the grass.

TIMELINE

0-5s	Trotting by the bike
5-10s	Water stop
10-15s	Past the cornfield
15-20s	Paw check
20-25s	Resting in the grass

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Trotting by the bike): Quiet paved farm road between wheat fields, early morning, cool and cloudy with soft grey light. Camera filmed by a friend riding behind. The dog trots at an easy steady pace on the right side of the handler's bicycle, pedaled at walking pace, connected by a loose leash. Sound: bicycle tires humming, birds, the dog's steady breathing. 5-10s (Water stop): Grassy roadside next to the farm road, cloudy morning light, the bicycle leaning on a wooden fence post. The handler's hands pour water from a bottle into a collapsible bowl. The dog drinks eagerly, water dripping from his chin onto the grass. Sound: water pouring, lapping, handler says "halfway there". 10-15s (Past the cornfield): Farm road beside a tall green cornfield, cool cloudy morning, damp asphalt. The dog keeps trotting beside the bicycle with his mouth slightly open, tongue relaxed, head level, his paws hitting the road in an even rhythm, the bicycle wheel turning slowly beside him. Sound: corn leaves rustling, paws pattering, bicycle chain clicking. 15-20s (Paw check): Gravel shoulder of the farm road, cloudy morning light, bicycle on its kickstand. The handler kneels and lifts each of the dog's paws to check the pads. He stands patiently, breathing evenly, and sniffs the handler's cap, his tail wagging slowly. Sound: gravel crunching, handler says "pads look good", crows. 20-25s (Resting in the grass): Grassy field edge at the end of the farm road, cloudy morning light, a hay bale and the parked bicycle nearby. The dog lies down in the cool grass, rolls onto his side for a moment, then sits up and looks around, tongue out, calm and ready. Sound: wind over the fields, relaxed panting, handler says "easy for you".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Trotting by the bike

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Quiet paved farm road between wheat fields, early morning, cool and cloudy with soft grey light. Camera filmed by a friend riding behind. The dog trots at an easy steady pace on the right side of the handler's bicycle, pedaled at walking pace, connected by a loose leash. Sound: bicycle tires humming, birds, the dog's steady breathing.

Clip 2 | 5-10s | Water stop

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. FACEBOOK CAPTION

Twenty kilometers and he still wanted more.
Cool morning, lots of water breaks, paws checked.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
