Wind in His Ears on the Ridge

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A windy afternoon walk along a broad ridge trail: walking into the wind, ears flapping, a nose-in-the-air pause, a recall up the trail and resting behind a boulder out of the wind.

TIMELINE

0-5s	Walking into wind
5-10s	Ears flapping
10-15s	Nose in the air
15-20s	Recall up the trail
20-25s	Rest behind boulder

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Walking into wind): Broad open ridge trail on a windy afternoon, bright patchy clouds, wide gravel path with low heather on both sides and the slope far off to the side. The dog walks ahead on the middle of the trail, fur rippling in the wind, head slightly lowered, steady and unbothered. Sound: strong wind roaring on the phone mic, gravel crunching. 5-10s (Ears flapping): Same wide ridge path in breezy afternoon daylight, clouds moving fast overhead. Close view of the dog standing in the center of the trail facing the wind, his upright ears pressed and fluttering, the fur on his neck lifting in waves, eyes half squinted. Sound: wind gusting, owner laughing "your ears!". 10-15s (Nose in the air): Middle of the broad ridge trail, afternoon light breaking through clouds, heather and flat grey rocks around. The dog stops, lifts his nose high and sniffs the air in quick short pulls, nostrils working, head turning slowly left and right, staying well back from the far slope. Sound: rapid sniffing, wind, a distant bird of prey calling. 15-20s (Recall up the trail): Wide gravel ridge trail stretching ahead, cloudy afternoon daylight. The dog is about twenty meters up the path. The owner calls and the dog spins around and runs straight back down the middle of the trail, ears back from the wind, and stops neatly at the owner's legs. Sound: owner calls "here!", paws pounding gravel, panting. 20-25s (Rest behind boulder): A large lichen-covered boulder beside the wide ridge trail, sheltered from the wind, grey afternoon light. The dog lies down in the calm spot behind the rock next to the owner's hiking boots, panting, fur settling, and rests his chin on his front paws. Sound: wind quieter behind the rock, panting slowing down, a contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Walking into wind

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Broad open ridge trail on a windy afternoon, bright patchy clouds, wide gravel path with low heather on both sides and the slope far off to the side. The dog walks ahead on the middle of the trail, fur rippling in the wind, head slightly lowered, steady and unbothered. Sound: strong wind roaring on the phone mic, gravel crunching.

Clip 2 | 5-10s | Ears flapping

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
