Patrolling the Farm Fence Line

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Walking the fence line on a small farm with the dog: trotting the fence, sniffing a fence post, checking the gate, pausing at the corner and heading back with the owner.

TIMELINE

0-5s	Trotting the fence
5-10s	Sniffing a post
10-15s	Checking the gate
15-20s	Corner pause
20-25s	Heading back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Trotting the fence): Small farm in late morning, flat overcast daylight, a long wooden post-and-wire fence running along a muddy grass field. The dog trots steadily along the inside of the fence line, nose low, tail level, a worn tractor path beside him, the owner filming from a few steps behind. Sound: paws on damp grass, birds, a distant tractor engine. 5-10s (Sniffing a post): Same farm fence line, grey late morning light, weathered wooden post with rusty wire staples and tall grass at its base. The dog stops and sniffs the bottom of the post carefully, working his nose up and down, then lifts his head and moves on. Sound: deep sniffing, wind in the grass, a rooster far away. 10-15s (Checking the gate): Old metal farm gate in the fence, closed with a chain, overcast daylight, a puddle and tire ruts in front of it. The dog walks up to the gate, sniffs along the bottom bar, then stands looking through the bars at the empty lane beyond, ears up. Sound: chain lightly clinking in the wind, sniffing, owner says "all good?". 15-20s (Corner pause): Corner of the farm field where two fences meet, grey daylight, a big fence post and a clump of nettles. The dog stops at the corner and stands still, scanning the neighboring field with a few hay bales in it, head turning slowly, tail low and calm. Sound: wind, crows, the dog's quiet breathing. 20-25s (Heading back): Long grassy farm track beside the fence, overcast late morning, a red barn in the distance. The dog falls in beside the owner's muddy rubber boots and walks back toward the barn at an easy pace, glancing up at the camera now and then. Sound: boots squelching, paws in mud, owner says "good patrol".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Trotting the fence

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Small farm in late morning, flat overcast daylight, a long wooden post-and-wire fence running along a muddy grass field. The dog trots steadily along the inside of the fence line, nose low, tail level, a worn tractor path beside him, the owner filming from a few steps behind. Sound: paws on damp grass, birds, a distant tractor engine.

Clip 2 | 5-10s | Sniffing a post

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
