Leading the Way on the Snowy Trail

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A snowy forest trail where the dog breaks the path: pushing through fresh snow, waiting for the owner, a nose dive in the snow, trotting over a small bridge and a snowy coat close-up.

TIMELINE

0-5s	Breaking trail
5-10s	Waiting for owner
10-15s	Nose dive
15-20s	Crossing bridge
20-25s	Snowy coat close-up

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Breaking trail): Forest trail after fresh snowfall, flat white winter daylight, snow up to the dog's elbows, tall pines heavy with snow. The dog pushes forward through the deep untouched snow ahead of the owner, bounding a little, leaving a clear path behind him. Sound: snow crunching and squeaking, heavy breathing, silent forest. 5-10s (Waiting for owner): Snowy forest trail, overcast winter light, snow falling softly. The dog stops a few meters ahead, turns around and stands waiting in the snow, ears up, steam coming from his mouth, as the owner's snow boots trudge toward him. Snowflakes collect on his black back while he waits patiently. Sound: owner's boots crunching, puffing, owner says "I'm coming". 10-15s (Nose dive): Side of the snowy trail near a fallen log, grey winter daylight. The dog shoves his whole muzzle deep into a soft snowbank, sniffing, then pulls his head out with snow stuck all over his face and sneezes. He licks the snow off his nose and dives in again. Sound: muffled sniffing, a loud sneeze, owner laughing. 15-20s (Crossing bridge): Small flat wooden footbridge on the forest trail, covered in snow, wooden railings on both sides, overcast winter light, a frozen stream below. The dog trots across the bridge in the middle, paws leaving prints in the snow, and waits on the far side. Sound: hollow paw steps on wood, a creek trickling under ice. 20-25s (Snowy coat close-up): Snowy forest trail, flat grey winter daylight, snowflakes drifting down. Close view of the dog standing still, snowflakes settling on his black back and his tan legs packed with little snowballs, then he gives a quick shake. Snow sprays off his coat and he looks up at the camera, ready to go on. Sound: soft falling snow, a shake, owner says "you're a snowman".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Breaking trail

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Forest trail after fresh snowfall, flat white winter daylight, snow up to the dog's elbows, tall pines heavy with snow. The dog pushes forward through the deep untouched snow ahead of the owner, bounding a little, leaving a clear path behind him. Sound: snow crunching and squeaking, heavy breathing, silent forest.

Clip 2 | 5-10s | Waiting for owner

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
