Guarding the Campsite at Night

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

An evening at a quiet campsite: settling by the tent, watching the dark woods, alert at an owl, lying near the lantern and finally curling up on his sleeping pad.

TIMELINE

0-5s	Settling by tent
5-10s	Watching the woods
10-15s	Owl alert
15-20s	Lying near lantern
20-25s	Curling up

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Settling by tent): Small forest campsite at dusk, fading blue evening light, a green dome tent, a battery lantern on a camp table and a small campfire in a stone ring far off to the side. The dog lies down in front of the tent on a foam mat, facing outward toward the trees. Sound: crackling fire in the distance, crickets, a zip of a jacket. 5-10s (Watching the woods): Campsite after dark, light only from the warm white battery lantern and the faraway campfire, dark pine trees around. The dog sits up on his mat, ears forward, staring steadily into the darkness between the tree trunks. His body is still, only his nostrils moving as he tests the night air. Sound: crickets, wind in pines, a twig snapping far away. 10-15s (Owl alert): Same dark campsite lit by the lantern on the table, the tent behind the dog. An owl hoots somewhere in the trees. The dog's head turns toward the sound, ears swiveling, and he gives one low soft woof, then goes quiet when the owner speaks. Sound: owl hooting, one low woof, owner whispers "it's okay, just an owl". 15-20s (Lying near lantern): Campsite at night, lantern light on the camp table casting a warm circle, campfire well away across the site. The dog lies on his side on the foam mat near the owner's camp chair legs, eyes open, slowly relaxing. His tail gives a few slow thumps on the mat. Sound: crickets, the fire popping far off, a sleepy sigh. 20-25s (Curling up): Inside the open door of the dome tent, lit by a small headlamp set to dim, sleeping bags on the floor. The dog curls up on his own fleece pad at the tent door, tucking his nose under his tail, and closes his eyes. Sound: nylon rustling, crickets outside, owner whispers "night, guard dog".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Settling by tent

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Small forest campsite at dusk, fading blue evening light, a green dome tent, a battery lantern on a camp table and a small campfire in a stone ring far off to the side. The dog lies down in front of the tent on a foam mat, facing outward toward the trees. Sound: crackling fire in the distance, crickets, a zip of a jacket.

Clip 2 | 5-10s | Watching the woods

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
