Canicross Trail Run

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A morning canicross run on a forest trail: getting hooked up, the start, running together on the trail, slowing at a turn and a cool-down drink.

TIMELINE

0-5s	Hooking up
5-10s	The start
10-15s	Running together
15-20s	Slowing at turn
20-25s	Cool-down drink

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Hooking up): Forest trailhead in the cool early morning, soft daylight through trees, a gravel parking spot. The dog stands wearing a padded running harness while the owner clips a stretchy bungee line from the harness to their waist belt, the dog shifting with excitement. Sound: clip snapping, excited whining, birds. 5-10s (The start): Same wide dirt forest trail, morning daylight, the owner's running shoes at the bottom of the frame. On the owner's word, the dog leans into the harness and starts running ahead, the bungee line stretching gently. His tail is up and his ears are forward as he settles into an easy rhythm. Sound: owner says "let's go", paws on dirt, breathing. 10-15s (Running together): Wide forest trail with dappled morning light, the owner running and filming from behind at waist height. The dog runs steadily ahead in the padded harness, line tight, ears back, tail out behind him. The bungee line absorbs every pull smoothly, and his feet land lightly on the soft packed dirt. Sound: pounding footsteps, panting, leaves crunching. 15-20s (Slowing at turn): Gentle bend on the forest trail, soft daylight, ferns along the sides. The owner calls a cue and the dog slows to a trot, follows the bend smoothly to the right, then picks up speed again on the straight. The bungee line stays loose for a moment, then tightens again. Sound: owner says "easy, right", paws slowing, breathing. 20-25s (Cool-down drink): Back at the trailhead, morning daylight, the bungee line unclipped and hanging. The dog drinks from a collapsible bowl the owner holds, panting between laps, harness still on, steam rising from his back. The owner's other hand strokes his side gently while he drinks, and he wags his tail between sips. Sound: lapping water, heavy panting, owner says "great run".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hooking up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Forest trailhead in the cool early morning, soft daylight through trees, a gravel parking spot. The dog stands wearing a padded running harness while the owner clips a stretchy bungee line from the harness to their waist belt, the dog shifting with excitement. Sound: clip snapping, excited whining, birds.

Clip 2 | 5-10s | The start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
