Sentinel at the Barn Door

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The dog keeping watch at the barn: lying in the doorway, rising to check a sound, watching a truck arrive, greeting the owner and settling back into place.

TIMELINE

0-5s	Lying in doorway
5-10s	Checking a sound
10-15s	Watching truck arrive
15-20s	Greeting owner
20-25s	Settling back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Lying in doorway): Wide open doorway of a red wooden barn in the afternoon, soft overcast daylight outside, dim interior with hay bales. The dog lies across the threshold on the dusty concrete, head up, watching the farmyard. Dust floats in the light from the doorway, and his ears turn slowly at every small farm sound. Sound: hens clucking, wind, a creaking barn door. 5-10s (Checking a sound): Same barn doorway, overcast afternoon light. A noise comes from the side of the barn and the dog rises to his feet, ears forward, walks a few steps outside and looks around the corner, then relaxes. He sniffs the air once, then walks calmly back toward the barn doorway. Sound: a clatter of a metal bucket, paws on concrete, owner says "what was that?". 10-15s (Watching truck arrive): Farmyard in front of the barn, grey daylight, a gravel driveway. An old pickup truck rolls slowly into the yard and the dog stands in the doorway watching it calmly, tail wagging slowly when he recognizes it. He stays in his spot, not moving toward the truck, just watching. Sound: tires on gravel, engine idling, a truck door. 15-20s (Greeting owner): Barn doorway, overcast afternoon light. The owner's legs in work jeans walk up and the dog trots over, sniffs their hand and leans against their legs, tail wagging, then looks up at the camera. The owner's hand scratches behind his ears and he closes his eyes for a moment, enjoying it. Sound: happy whining, owner says "hey buddy, keeping watch?". 20-25s (Settling back): Barn doorway in soft afternoon light, hay dust drifting in the air. The dog walks back to his spot on the threshold, turns once and lies down again facing the yard, chin up and alert. His ears stay upright, turning toward every small noise, and his tail lies calmly on the concrete. Sound: a contented sigh, hens clucking, wind.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Lying in doorway

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Wide open doorway of a red wooden barn in the afternoon, soft overcast daylight outside, dim interior with hay bales. The dog lies across the threshold on the dusty concrete, head up, watching the farmyard. Dust floats in the light from the doorway, and his ears turn slowly at every small farm sound. Sound: hens clucking, wind, a creaking barn door.

Clip 2 | 5-10s | Checking a sound

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
