Blizzard Morning Walk

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A short walk on a blizzard morning: pushing out the door into the snow, walking the snowy lane, catching snowflakes, bounding through drifts and stamping snow off back inside.

TIMELINE

0-5s	Out the door
5-10s	Snowy lane walk
10-15s	Catching snowflakes
15-20s	Bounding through drifts
20-25s	Stamping snow off

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Out the door): Front door of a rural house on a stormy winter morning, thick snow falling sideways, flat white daylight, deep snow on the porch steps. The dog pushes out the door and stops on the porch, squinting into the blowing snow. Sound: howling wind, door creaking, owner says "you sure?". 5-10s (Snowy lane walk): Snow-covered country lane, heavy snowfall and wind, grey-white daylight, fence posts half buried. The dog walks steadily ahead into the blowing snow, his black coat quickly turning white on top, head low. Snow piles on his ears and back but he keeps going, glancing back at the owner now and then through the swirling flakes. Sound: wind roaring, snow crunching, owner's breath. 10-15s (Catching snowflakes): Same snowy lane, thick flakes swirling, flat winter daylight. The dog stops and snaps at the falling snowflakes in the air, jaws clicking, then shakes his head and does it again. Snowflakes stick to his whiskers and eyebrows, and his tail wags happily as he tries again and again to catch one. Sound: snapping jaws, wind, owner laughing. 15-20s (Bounding through drifts): Deep snowdrifts along the side of the lane, heavy snowfall, grey light. The dog leaps through the chest-deep drifts in big bounds, snow flying up around him, then stops and looks back at the owner. His tail is high and wagging, and snow sticks to his face and chest. Sound: soft snow thumps, panting, wind gusts. 20-25s (Stamping snow off): Inside the front hallway, warm yellow lamp light, a doormat and boots on the floor. The dog stands on the mat while the owner's hands rub his snowy coat with an old towel, snow melting on the floor. He wags his tail and shakes off the last of the snow. Sound: towel rubbing, dripping, owner says "that's enough for today".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Out the door

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Front door of a rural house on a stormy winter morning, thick snow falling sideways, flat white daylight, deep snow on the porch steps. The dog pushes out the door and stops on the porch, squinting into the blowing snow. Sound: howling wind, door creaking, owner says "you sure?".

Clip 2 | 5-10s | Snowy lane walk

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
