Training Day With a Search and Rescue Team

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A morning with a local volunteer search and rescue team: gearing up, waiting for the cue, working the scent through tall grass, a bark alert at the hidden volunteer and a tug reward.

TIMELINE

0-5s	Gearing up
5-10s	Waiting for the cue
10-15s	Working the scent
15-20s	Bark alert
20-25s	Tug reward

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Gearing up): Gravel parking area beside a rural training field, cool overcast morning, a few parked cars and an open hatchback with plain gear bags inside. The owner's hands clip a long orange line to the dog's harness while he stands still, ears up, staring toward the field and shifting his weight from paw to paw. Sound: gravel crunching, a car door closing, tags jingling, owner says "ready to work?". 5-10s (Waiting for the cue): Edge of a wide field of tall dry grass, flat grey daylight, a line of bare trees in the distance. The dog sits beside the owner's legs, body tense and still, nose lifting to test the breeze. Two team members in plain dark jackets stand a few meters away, talking quietly and watching him. Sound: wind in the grass, quiet voices, the dog's eager whine, a crow in the distance. 10-15s (Working the scent): Same field, overcast daylight. The owner says the search word and the dog bursts forward into the waist-high grass, zigzagging across the wind with his head high, then dropping his nose low. The camera follows from behind, bouncing as the owner jogs and lets the long line slide through gloved hands. Sound: grass swishing, owner's heavy breathing, the line rustling, a far-off dog bark. 15-20s (Bark alert): Far corner of the field near a low pile of cut branches, grey daylight. A volunteer in a green jacket sits hidden behind the branches. The dog stops beside the pile, plants his feet and barks steadily toward her, looking back at the camera between barks while his tail swings hard. Sound: loud steady barking, branches creaking, volunteer laughs, owner calls "good find!". 20-25s (Tug reward): Same spot by the branch pile, overcast morning. The volunteer stands up and holds out a short braided tug toy. The dog grabs it and pulls backward with his whole body, growling playfully, then lets go when she says out and sits, panting with dry grass seeds stuck to his chest. Sound: playful growling, rope creaking, volunteer says "what a good boy", panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Gearing up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Gravel parking area beside a rural training field, cool overcast morning, a few parked cars and an open hatchback with plain gear bags inside. The owner's hands clip a long orange line to the dog's harness while he stands still, ears up, staring toward the field and shifting his weight from paw to paw. Sound: gravel crunching, a car door closing, tags jingling, owner says "ready to work?".

Clip 2 | 5-10s | Waiting for the cue

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Edge of a wide field of tall dry grass, flat grey daylight, a line of bare trees in the distance. The dog sits beside the owner's legs, body tense and still, nose lifting to test the breeze. Two team members in plain dark jackets stand a few meters away, talking quietly and watching him. Sound: wind in the grass, quiet voices, the dog's eager whine, a crow in the distance.

Clip 3 | 10-15s | Working the scent

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
