A Veteran and His Service Dog

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A quiet day with a veteran and his service dog: a calm heel on the sidewalk, waiting at the crosswalk, leaning in on a park bench, bringing slippers and resting his head on his lap.

TIMELINE

0-5s	Calm heel
5-10s	Waiting at the crosswalk
10-15s	Leaning in on the bench
15-20s	Bringing slippers
20-25s	Head on his lap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Calm heel): Quiet residential sidewalk, early morning, soft grey daylight, parked cars and trimmed hedges. A man in his fifties in a grey t-shirt and cargo pants walks slowly with the dog at his left side. The dog wears a plain dark green vest with no text or patches and keeps a loose leash, glancing up at him often. Sound: footsteps on concrete, birds, a car passing slowly, tags jingling. 5-10s (Waiting at the crosswalk): Street corner with a low curb, morning overcast light, a few leaves in the gutter. The man stops and the dog sits immediately beside his left foot, still and attentive, watching a single car roll past. When the man takes a step, the dog rises and moves with him in perfect rhythm. Sound: car tires on wet asphalt, a dog collar clink, the man says quietly "okay, let's go". 10-15s (Leaning in on the bench): Small neighborhood park, mid-morning, pale sunlight through thin clouds, a worn wooden bench by a gravel path. The man sits and rubs his face with both hands. The dog, still in his plain vest, stands up and leans his shoulder firmly against the man's shins, resting his chin on his knee. Sound: birds, distant kids playing, a long breath from the man, soft panting. 15-20s (Bringing slippers): Small living room at home, afternoon, daylight from a side window, worn brown carpet and a recliner. The vest is off. The man points toward the hallway and the dog trots back carrying one grey felt slipper in his mouth, drops it at the recliner, then goes back for the second. Sound: paws on carpet, the man chuckles and says "there's the other one". 20-25s (Head on his lap): Same living room in the evening, a single warm table lamp on, television off. The man sits on a plaid couch and the dog rests his whole head on his lap, eyes half closed, while the man slowly strokes his ears with one hand. The dog lets out a long sigh. Sound: quiet room, a clock ticking, the dog's long sigh, the man says "we did good today".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Calm heel

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Sound: quiet room, a clock ticking, the dog's long sigh, the man says "we did good today".

FACEBOOK CAPTION

My dad says the dog does more for him than any medicine ever did.
Thank you to every service dog quietly doing their job today.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
