Guide Dog in Training

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A guide work training session in the neighborhood: harness on in the driveway, stopping at a curb, steering around a trash bin, pausing at steps and play time once the harness comes off.

TIMELINE

0-5s	Harness on
5-10s	Stopping at the curb
10-15s	Around the obstacle
15-20s	Pausing at the steps
20-25s	Harness off play

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Harness on): Concrete driveway in front of a beige house, cloudy late morning, a recycling bin by the garage. A trainer in a navy fleece buckles a plain white harness with a rigid handle around the dog's chest. The harness has no text or patches. The dog stands still, tail low and relaxed, watching her hands. Sound: buckle clicking, birds, a lawn mower far away, trainer says "good, stand". 5-10s (Stopping at the curb): Neighborhood sidewalk, overcast daylight, maple trees and parked cars. The trainer walks holding the harness handle with her eyes on the dog. At the edge of the curb the dog stops firmly with both front paws right at the edge and waits, and she praises him quietly. Sound: footsteps, a car passing on the cross street, trainer says "yes, good stop". 10-15s (Around the obstacle): Same sidewalk, grey daylight, a large plain green trash bin left in the middle of the path. The dog slows, angles to the grassy edge and guides the trainer smoothly around the bin, then steps back onto the center of the sidewalk without being told. Sound: paws on concrete, a soft click from the trainer, wind rustling leaves. 15-20s (Pausing at the steps): Front path of a neighbor's brick house, overcast afternoon light, three wide concrete steps with a metal railing. The dog walks up to the first step and stops, front paws just touching it, looking up the stairs. The trainer reaches with her foot, finds the step and says good. Sound: quiet street, a dog barking far off, trainer says "good boy, find the steps". 20-25s (Harness off play): Small front lawn, cloudy afternoon, patchy grass and a low wooden fence. The trainer unbuckles the white harness and tosses a blue rubber ball. The dog's whole body loosens up and he races after it, then bounces back with the ball, tail wagging wide. Sound: buckle click, ball bouncing, happy panting, trainer laughs "okay, off duty".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Harness on

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Concrete driveway in front of a beige house, cloudy late morning, a recycling bin by the garage. A trainer in a navy fleece buckles a plain white harness with a rigid handle around the dog's chest. The harness has no text or patches. The dog stands still, tail low and relaxed, watching her hands. Sound: buckle clicking, birds, a lawn mower far away, trainer says "good, stand".

Clip 2 | 5-10s | Stopping at the curb

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. The dog's whole body loosens up and he races after it, then bounces back with the ball, tail wagging wide. Sound: buckle click, ball bouncing, happy panting, trainer laughs "okay, off duty".

FACEBOOK CAPTION

Watching him switch from serious worker to goofball the second the harness comes off.
Training days are long but so worth it.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
