Medical Alert Training

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A home training session for medical alert work: sniffing a scent tin, a nose bump alert, alerting on the couch, fetching a small kit pouch and a big treat reward.

TIMELINE

0-5s	Sniffing the scent tin
5-10s	Nose bump alert
10-15s	Alert on the couch
15-20s	Fetching the kit pouch
20-25s	Treat and praise

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Sniffing the scent tin): Living room with a grey couch and a worn rug, bright afternoon daylight from a big window. The dog wears a plain blue vest with no text or patches. A trainer kneels and holds out a small open metal tin with a cotton pad inside. The dog sniffs it carefully, nose twitching. Sound: quiet room, deep sniffing, trainer says "that's it, smell it". 5-10s (Nose bump alert): Same living room, afternoon daylight. The trainer sits on the rug with the tin hidden in her closed hand by her knee. The dog sniffs her hand, then firmly bumps her knee twice with his nose and stares into her face. She smiles and marks it with a click. Sound: clicker click, trainer says "yes, good alert", tags jingling. 10-15s (Alert on the couch): Same room, late afternoon light. The owner sits on the grey couch pretending to read a book with a plain cover. The dog walks over, sniffs the owner's hand, then places one front paw on the owner's knee and holds it there, staring up. Sound: page turning, a soft whine, owner says quietly "okay, I hear you". 15-20s (Fetching the kit pouch): Hallway with white walls and a shoe rack, daylight from the living room. A small plain black zip pouch hangs low on a hook. The trainer says get it and the dog pulls the pouch off by its loop, trots back down the hallway and holds it up to the owner on the couch. Sound: paws on laminate floor, zipper pull clinking, trainer says "bring it". 20-25s (Treat and praise): Living room again, late afternoon daylight. The trainer gives the dog a small piece of dried chicken and both of them rub his ears. He wags hard, licks the trainer's wrist, then lies down on the rug and rolls half onto his side, tired and content. Sound: happy panting, laughter, trainer says "best boy", couch creaking.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sniffing the scent tin

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Living room with a grey couch and a worn rug, bright afternoon daylight from a big window. The dog wears a plain blue vest with no text or patches. A trainer kneels and holds out a small open metal tin with a cotton pad inside. The dog sniffs it carefully, nose twitching. Sound: quiet room, deep sniffing, trainer says "that's it, smell it".

Clip 2 | 5-10s | Nose bump alert

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. FACEBOOK CAPTION

Week six of medical alert training and he is nailing it.
It still amazes me what that nose can do.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
