Warning Us About the Open Gate

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The wind blew the side gate open and he made sure we knew: noticing it, barking at the back door, leading us outside, guarding the gap and getting a reward once it was latched.

TIMELINE

0-5s	Noticing the gate
5-10s	Barking at the door
10-15s	Leading us outside
15-20s	Guarding the gap
20-25s	Latched and rewarded

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Noticing the gate): Backyard on a windy afternoon, grey clouds moving fast, patchy grass and a tall wooden fence. The side gate swings slowly open in the wind and bumps the fence. The dog, lying on the grass, lifts his head, stands up and stares at the open gap, ears forward. Sound: wind gusting, gate creaking and knocking, leaves blowing across the patio. 5-10s (Barking at the door): Kitchen at the back of the house, flat afternoon daylight through a glass patio door. The dog stands outside the door barking firmly, then spins and looks back toward the yard. The owner's point of view walks toward the door from the kitchen table. Sound: sharp repeated barks through the glass, owner says "okay, what is it?". 10-15s (Leading us outside): Backyard, windy overcast afternoon. The owner steps out holding the phone and the dog trots ahead across the grass toward the side of the house, looking back over his shoulder twice to make sure the owner is following, his ears pinned back against the wind. Sound: wind, footsteps on grass, owner says "show me", tags jingling. 15-20s (Guarding the gap): Narrow side yard by the house, grey daylight, trash bins against the wall. The open wooden gate shows the front sidewalk beyond. The dog stands squarely in the gateway facing the yard, not stepping out, and gives one deep woof toward the owner. Sound: one deep bark, wind, a car passing on the street beyond the gate. 20-25s (Latched and rewarded): Same side yard, overcast afternoon. The owner's hand swings the gate shut and clicks the metal latch down. The dog sits right away, tail sweeping the gravel, and takes a small treat gently from the owner's fingers, then leans against the owner's leg. Sound: latch clicking, owner says "good catch, buddy, good catch", happy panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Noticing the gate

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Backyard on a windy afternoon, grey clouds moving fast, patchy grass and a tall wooden fence. The side gate swings slowly open in the wind and bumps the fence. The dog, lying on the grass, lifts his head, stands up and stares at the open gap, ears forward. Sound: wind gusting, gate creaking and knocking, leaves blowing across the patio.

Clip 2 | 5-10s | Barking at the door

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. The dog sits right away, tail sweeping the gravel, and takes a small treat gently from the owner's fingers, then leans against the owner's leg. Sound: latch clicking, owner says "good catch, buddy, good catch", happy panting.

FACEBOOK CAPTION

The wind blew the gate open and he would not stop until I came outside.
Better than any alarm system.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
