Snow Search Practice

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Winter training with the rescue team: waiting at the start, working the wind across the snow, finding a volunteer in a shallow open trench, a tug reward and a paw check.

TIMELINE

0-5s	Waiting at the start
5-10s	Working the wind
10-15s	Finding the trench
15-20s	Tug reward
20-25s	Paw check

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Waiting at the start): Open snowy field at the edge of a pine forest, cold overcast morning, flat white light. The dog sits in the snow beside the owner's boots wearing a plain red harness with no text, breath steaming, ears up. Two rescue team members in winter jackets stand nearby holding thermoses. Sound: wind, snow crunching, team member says "whenever you're ready". 5-10s (Working the wind): Same snowy field, flat grey daylight, footprints scattered across the snow. On the search command the dog bounds forward through ankle-deep snow, zigzagging with his head high to catch the scent, snow puffing up around his legs and the team watching from behind. Sound: snow crunching fast, owner breathing hard, wind gusting. 10-15s (Finding the trench): Middle of the snowy field, overcast light. A volunteer in a blue snowsuit lies in a shallow open trench in the snow, face and body visible from above. The dog stops at the edge, paws at the snow once and barks loudly toward the volunteer. Sound: loud barking, the volunteer laughs, snow crunching, team member says "good alert". 15-20s (Tug reward): Beside the shallow snow trench, flat grey daylight. The volunteer sits up and pulls a short red tug from her pocket. The dog grabs it and pulls, tail swinging, snow flying from his fur, then lets go on out. The rescue team walks over in the background. Sound: playful growling, volunteer laughs "you found me", team clapping with gloves. 20-25s (Paw check): Snowy field near the parked team vehicles, overcast morning, plain dark SUVs with no markings in the background. A team member kneels and gently lifts each of the dog's front paws, brushing snow from between his pads with a gloved hand while he stands patiently. Sound: snow brushing, team member says "paws look good", wind.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Waiting at the start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Open snowy field at the edge of a pine forest, cold overcast morning, flat white light. The dog sits in the snow beside the owner's boots wearing a plain red harness with no text, breath steaming, ears up. Two rescue team members in winter jackets stand nearby holding thermoses. Sound: wind, snow crunching, team member says "whenever you're ready".

Clip 2 | 5-10s | Working the wind

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. Sound: snow brushing, team member says "paws look good", wind.

FACEBOOK CAPTION

Winter search practice with the team. He loves the snow more than anyone.
The volunteer was fine, she just said it was cold lying in there.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
