Puppy's First Training Lesson

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His very first lesson at home in the living room: a lure into a sit, a nose touch to my hand, looking up at his name, a short down on the mat and a tug reward before he crashes.

TIMELINE

0-5s	Lure into sit
5-10s	Nose to hand
10-15s	Name recognition
15-20s	Down on the mat
20-25s	Tug reward

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. 0-5s (Lure into sit): Small living room, late morning daylight from a big window, light wood floor and a grey rug. The owner kneels and holds a small treat above the puppy's nose. The puppy follows it upward with his head until his bottom plops down onto the rug, and the treat drops into his mouth. Sound: quiet room, tiny chewing, owner says "yes, good sit". 5-10s (Nose to hand): Same living room, daylight from the window, grey rug. The owner holds an open flat palm low near the floor. The puppy waddles over, bumps the palm with his wet nose and instantly gets a treat from the other hand. He wags his whole back end. Sound: soft paw pads on the rug, owner says "touch, good boy". 10-15s (Name recognition): Living room, natural daylight, the puppy sniffs a corner of the grey rug a few steps away from the owner. The owner says his name softly. The puppy's head pops up, floppy ears flapping, and he trots straight back toward the camera for a treat. Sound: quiet room, owner says "his name" in a happy voice, then "yes". 15-20s (Down on the mat): Same living room, daylight, a small folded brown towel on the wood floor. The owner lowers a treat slowly from the puppy's nose to the towel. The puppy folds his front legs and lies down on the towel, then gets the treat and stays there chewing. Sound: soft crunching, owner says "down, nice". 20-25s (Tug reward): Living room, daylight from the window, grey rug. The owner wiggles a small fleece tug toy along the floor. The puppy pounces, grabs it with his tiny teeth and pulls back with a little growl, tail wagging, then drops it and flops down on the rug, sleepy. Sound: tiny puppy growl, fleece rustling, owner laughing "lesson over".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Lure into sit

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. Small living room, late morning daylight from a big window, light wood floor and a grey rug. The owner kneels and holds a small treat above the puppy's nose. The puppy follows it upward with his head until his bottom plops down onto the rug, and the treat drops into his mouth. Sound: quiet room, tiny chewing, owner says "yes, good sit".

Clip 2 | 5-10s | Nose to hand

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
