Puppy's First Tracking Game

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A baby tracking game on the dewy back lawn: I lay a short footstep track with tiny treats, he puts his nose down, finds each treat, discovers the toy at the end and gets a big party.

TIMELINE

0-5s	Laying the track
5-10s	Nose goes down
10-15s	Following footprints
15-20s	Finds the toy
20-25s	Celebration

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. 0-5s (Laying the track): Back lawn, early morning, cool overcast light, short grass wet with dew, a wooden fence and a garden shed behind. The camera shows the owner's rubber boots taking short steps in a straight line, pressing dark footprints into the wet grass while a hand drops a tiny treat into each print. Sound: boots squishing on wet grass, birds, owner says "okay, short and easy". 5-10s (Nose goes down): Same dewy back lawn, overcast morning light. The puppy stands at the first footprint on a long thin line held loosely by the owner. He sniffs the dark print, finds the treat, eats it and puts his nose right back down to the grass. Sound: little sniffs, munching, owner whispers "search". 10-15s (Following footprints): Back lawn, cool morning light, wet grass. The puppy waddles slowly from footprint to footprint with his nose low, his big paws leaving tiny marks in the dew. He stops at each print to lick up a treat, the thin line slack behind him. Sound: quiet sniffing, birds, a car passing far away. 15-20s (Finds the toy): End of the short track near the garden shed, overcast morning light. A small rolled sock toy lies in the last footprint. The puppy reaches it, sniffs, picks it up proudly in his mouth and looks around with his floppy ears bouncing. Sound: happy sniff, owner says "you found it" in a high voice. 20-25s (Celebration): Same back lawn, morning light, wet grass. The owner kneels down and the puppy runs over carrying the sock toy, tripping slightly over his own paws. The owner's hands rub his chest and ears while he chews the sock and wags hard. Sound: owner cheering softly "good tracking", puppy grumbles, birds.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Laying the track

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. Back lawn, early morning, cool overcast light, short grass wet with dew, a wooden fence and a garden shed behind. The camera shows the owner's rubber boots taking short steps in a straight line, pressing dark footprints into the wet grass while a hand drops a tiny treat into each print. Sound: boots squishing on wet grass, birds, owner says "okay, short and easy".

Clip 2 | 5-10s | Nose goes down

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
