Puppy Explores the Training Field

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first visit to the club training field just to look around: meeting the grass, sniffing a cone, checking out a low ramp, following me across the field and resting by the bench.

TIMELINE

0-5s	Set down on grass
5-10s	Sniffing a cone
10-15s	Checking the ramp
15-20s	Following the handler
20-25s	Rest by the bench

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. 0-5s (Set down on grass): Edge of an empty dog club training field, cloudy late morning daylight, wide mowed grass, a chain link fence and a small wooden clubhouse behind. The owner's hands set the puppy down on the grass. He stands still for a moment, sniffing the air with his ears flopping in the breeze. Sound: wind across the field, distant birds, owner says "welcome to the field". 5-10s (Sniffing a cone): Same training field, cloudy daylight, a faded orange plastic cone on the grass. The puppy approaches it slowly, stretches his neck, sniffs it, then bumps it with his nose so it wobbles. He jumps back a little, then sniffs it again, braver. Sound: breeze, tiny sniffs, owner chuckling. 10-15s (Checking the ramp): Training field, cloudy daylight, a low wide wooden ramp lying flat on the grass, only a few centimeters high. The puppy puts his front paws on the wood, sniffs it, and then walks all four paws onto it before stepping off the other side. Sound: paws tapping on wood, owner says "brave boy". 15-20s (Following the handler): Open mowed training field, cloudy daylight, chain link fence far behind. The owner walks slowly across the grass and the camera points down at the puppy trotting right beside the owner's sneakers, looking up now and then, ears bouncing with each step. Sound: footsteps on grass, tags jingling, wind. 20-25s (Rest by the bench): Beside the wooden clubhouse at the edge of the field, shade from a small roof, cloudy daylight. The puppy laps water from a small steel bowl on the gravel, then lies down under a wooden bench with his chin on his paws, watching the field. Sound: water lapping, gravel crunching, a sleepy sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Set down on grass

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
