Puppy Learns to Climb Small Obstacles

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A homemade puppy playground in the backyard: walking a low plank, stepping into a flat tire, climbing two little steps, trying a wobble board and resting after all that confidence work.

TIMELINE

0-5s	Low plank walk
5-10s	Into the tire
10-15s	Two little steps
15-20s	Wobble board
20-25s	Tired puppy rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male working-line German Shepherd puppy, mostly black fluffy fur with small tan marks on the paws and cheeks, oversized paws and floppy ears, alert curious eyes, wearing a small orange collar. 0-5s (Low plank walk): Backyard, mild afternoon, soft overcast daylight, patchy grass and a wooden fence. A wide wooden plank lies flat on the grass. The owner's hand holds a treat ahead and the puppy walks the length of the plank, paws placed carefully, and hops off at the end. Sound: paws on wood, birds, owner says "good job". 5-10s (Into the tire): Same backyard, overcast daylight, an old car tire lying flat on the grass. The puppy puts one front paw over the rim, then the other, climbs into the middle, sniffs the rubber, and scrambles out the far side toward the owner's hand. Sound: soft scrabbling on rubber, owner laughs "there you go". 10-15s (Two little steps): Backyard by the patio, overcast daylight, two low wooden steps built from boards, each only a few centimeters high. The puppy climbs up the first step, pauses, then pulls himself onto the second with his big paws and stands on top wagging. Sound: paws thumping on wood, a tiny grunt, owner cheering. 15-20s (Wobble board): Backyard grass, overcast daylight, a small square wobble board resting on a soft ball underneath, barely tilting. The puppy steps on with his front paws, the board tips slightly, he freezes, then steps fully on and gets a treat from the owner. Sound: board tapping the grass, owner says "yes, brave". 20-25s (Tired puppy rest): Shady corner of the backyard under a small tree, overcast daylight, an old folded blanket on the grass. The puppy lies on the blanket, rolls slightly on his side, and his eyes slowly close while the owner's hand strokes his fluffy back. Sound: birds, wind in the leaves, soft puppy breathing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Low plank walk

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
