His First Big Jump

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

At six months he finally got a real jump, kept low for his growing joints: warm-up trot, stepping over a bar on the ground, a tiny hop, his big moment at knee height and a tug party.

TIMELINE

0-5s	Warm-up trot
5-10s	Bar on the ground
10-15s	Tiny hop
15-20s	The big jump
20-25s	Tug party

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 6-month-old male working-line bi-color German Shepherd, lanky with long legs and big ears, almost fully black with tan lower legs, wearing an orange biothane collar. 0-5s (Warm-up trot): Grass training field, cool evening, soft overcast daylight, mowed grass and a chain link fence behind. The young dog trots in a loose circle beside the handler's legs, long legs moving a little clumsily, ears up, looking at the tug toy tucked in the handler's back pocket. Sound: footsteps on grass, tags jingling, handler says "let's warm up". 5-10s (Bar on the ground): Same training field, overcast evening light, a white plastic jump bar resting on the soft grass between two short wooden wings. The young dog trots over the bar at the handler's side, lifting his long legs, and gets a treat right after. Sound: paws on grass, handler says "over, good". 10-15s (Tiny hop): Training field, overcast evening daylight, the white bar now set just above ankle height on the low wooden wings, soft grass on both sides. The young dog bounces over it with an easy little hop and lands lightly, looking back at the handler. Sound: light thump on grass, handler laughs "easy". 15-20s (The big jump): Same field, evening overcast light, the bar raised to about knee height, still low standard training equipment on soft grass. The handler releases him, he runs in and clears the bar with his ears flying back, lands gently and keeps running. Sound: quick paws, a soft landing, handler cheers "yes, big boy". 20-25s (Tug party): Training field, overcast evening light, mowed grass. The handler pulls a red jute tug from the pocket and the young dog grabs it, pulling backward with his tail wagging, then lets go on "out" and sits panting with a goofy open mouth. Sound: tug grunts, panting, handler says "out, good boy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Warm-up trot

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 6-month-old male working-line bi-color German Shepherd, lanky with long legs and big ears, almost fully black with tan lower legs, wearing an orange biothane collar. Grass training field, cool evening, soft overcast daylight, mowed grass and a chain link fence behind. The young dog trots in a loose circle beside the handler's legs, long legs moving a little clumsily, ears up, looking at the tug toy tucked in the handler's back pocket. Sound: footsteps on grass, tags jingling, handler says "let's warm up".

Clip 2 | 5-10s | Bar on the ground

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 6-month-old male working-line bi-color German Shepherd, lanky with long legs and big ears, almost fully black with tan lower legs, wearing an orange biothane collar. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
