First Day in Training Class

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first group class at the training hall: arriving in the parking lot, sitting while the instructor walks by, a few heel steps, ignoring a dog across the room and a sleepy ride home.

TIMELINE

0-5s	Arriving at class
5-10s	Sit while instructor passes
10-15s	First heel steps
15-20s	Ignoring another dog
20-25s	Sleepy ride home

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 6-month-old male working-line bi-color German Shepherd, lanky with long legs and big ears, almost fully black with tan lower legs, wearing an orange biothane collar. 0-5s (Arriving at class): Gravel parking lot outside a plain metal training hall, early evening, grey cloudy daylight. The young dog hops down from the open car hatch onto the gravel, sniffs the ground eagerly, then looks up at the handler with his big ears perked and tail high. Sound: gravel crunching, a car door, handler says "ready for class?". 5-10s (Sit while instructor passes): Inside the training hall, bright ordinary ceiling lights, black rubber floor mats. The young dog sits beside the handler's left leg on a short leash. The instructor's legs in jeans walk past slowly. He watches, wiggles, but stays sitting. Other handlers stand far apart along the walls. Sound: echoey hall, footsteps on rubber, handler whispers "stay, good". 10-15s (First heel steps): Training hall, ordinary ceiling lights, rubber mats. The handler walks forward a few steps holding a treat by the left hip. The young dog trots alongside, looking up at the hand, a little too close and bumping the handler's knee once. Sound: footsteps, tags jingling, instructor's voice says "nice, keep going". 15-20s (Ignoring another dog): Training hall, ceiling lights, rubber floor. Far across the room another dog sits with its owner. The young dog stares at it with ears forward, the handler says his name, and he turns his head back to the handler and gets a treat. Sound: distant bark, echo, handler says "yes, look at me". 20-25s (Sleepy ride home): Back of the car, evening, dim daylight through the rear windows. The young dog lies in an open crate on a grey blanket, eyes heavy, chin resting on the edge, then lets out a long sigh and closes his eyes as the car drives. Sound: engine hum, turn signal clicking, a long tired sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Arriving at class

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
