Sprint Across the Field

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A big empty hay meadow and a dog who needs to run: a long recall sprint, chasing a thrown ball, racing along the fence line, charging up a hill and a cool-down drink in the shade.

TIMELINE

0-5s	Long recall sprint
5-10s	Chasing the ball
10-15s	Along the fence
15-20s	Up the hill
20-25s	Cool-down drink

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Long recall sprint): Huge empty freshly cut hay meadow, late afternoon, warm plain daylight, short stubble and a tree line far away. The dog waits in the distance. The owner calls and he sprints straight at the camera, ears back, body low and stretched out. Sound: owner shouts "come", fast paws on stubble, heavy breathing. 5-10s (Chasing the ball): Same cut hay meadow, late afternoon daylight. The owner's arm throws a red rubber ball far across the stubble. The dog races after it in long strides, reaches it, scoops it up at full speed and swings around to run back. Sound: ball thudding, paws pounding, wind. 10-15s (Along the fence): Edge of the empty meadow, late afternoon light, an old wooden post fence with wire. The camera pans as the dog runs fast alongside the fence line from left to right, dust kicking up from the dry ground behind him. Sound: fast paw beats, owner laughing "look at him go". 15-20s (Up the hill): Gentle grassy hill at the far end of the meadow, late afternoon daylight. The dog charges up the slope with powerful pushes from his back legs, reaches the top and stops, standing tall and looking back down at the owner. Sound: wind on the hilltop, panting, owner calls "good boy". 20-25s (Cool-down drink): Shade under a big oak at the meadow's edge, late afternoon, dappled light. The dog drinks noisily from a collapsible water bowl, water dripping from his chin, then flops down on the cool grass, tongue out, still breathing hard. The owner's hand ruffles his damp neck. Sound: loud lapping, a deep sigh, leaves rustling.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Long recall sprint

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
