A Legend's Day Off

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

No training today: sleeping in while his gear hangs untouched, a slow sniffy creek walk, chewing an antler on the deck, lying in the tall grass and evening couch time.

TIMELINE

0-5s	Sleeping in
5-10s	Slow creek walk
10-15s	Antler chew
15-20s	Lying in tall grass
20-25s	Couch evening

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Sleeping in): Mudroom, late morning, daylight from a small window, a rubber boot tray and a hook with his harness and tug toy hanging untouched. The dog lies flat on his side on a round dog bed, eyes closed, one ear flopped over, ignoring the camera. Sound: quiet house, a slow snore, owner whispers "day off, huh?". 5-10s (Slow creek walk): Woodland path beside a shallow creek, late morning, soft daylight through trees, muddy patches and roots. The dog walks slowly on a long loose leash, nose deep in the ferns, stopping again and again to sniff the same spot. Small patches of daylight dot the path between the trees. Sound: creek trickling, birds, footsteps on wet leaves. 10-15s (Antler chew): Wooden back deck, early afternoon, bright plain daylight, a few potted plants and a patio chair. The dog lies on the boards holding a deer antler chew between his front paws, gnawing on one end with his eyes half closed. Sound: scraping and chewing, a lawn mower far away. 15-20s (Lying in tall grass): Edge of an unmowed backyard, mid afternoon, warm daylight, long grass and wildflowers. The dog lies in the tall grass, only his head and ears showing, watching a butterfly float past without bothering to get up. His tail swishes slowly through the grass once or twice. Sound: insects buzzing, breeze in the grass, owner laughs softly. 20-25s (Couch evening): Living room, evening, warm ordinary lamp light, a grey couch with a knitted blanket. The dog lies stretched across the couch with his head on the owner's lap, and the owner's hand slowly scratches behind his ear until he groans. Sound: quiet TV murmur, a happy groan, owner says "you earned it".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
