Training in the Rain Anyway

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Steady rain did not cancel practice: heeling in the downpour, a dumbbell retrieve from wet grass, a big shake, a muddy tug session and a towel rubdown in the car.

TIMELINE

0-5s	Heeling in the rain
5-10s	Wet retrieve
10-15s	Big shake
15-20s	Muddy tug
20-25s	Towel in the car

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male working-line bi-color German Shepherd, almost fully black with tan only on the lower legs and small tan marks on the cheeks and above the eyes, short dense coat, lean muscular athletic build, upright ears, intense focused eyes, wearing a worn orange biothane collar with a small metal tag, natural coat with a little dust from the field. 0-5s (Heeling in the rain): Grass training field, afternoon, steady rain, dark grey daylight, puddles forming. The dog heels at the handler's left leg, the handler wearing a dripping green raincoat. Rain drops bounce off his black back, his eyes still locked on the handler. Sound: steady rain, squishing footsteps, handler says "good, stay with me". 5-10s (Wet retrieve): Same rainy training field, dark grey daylight. The handler tosses a wooden dumbbell onto the soaked grass. The dog runs out, splashes through a puddle, picks it up and trots back to sit in front of the handler holding it. Sound: rain hissing, splash, handler says "bring it". 10-15s (Big shake): Training field in the rain, grey daylight. The dog stands and shakes his whole body hard, water spraying off his coat in every direction toward the camera. The handler laughs and steps back. His tail is still wagging, and the raincoat sleeves drip at the edge of the frame. Sound: spraying water, rain, handler laughing "thanks, buddy". 15-20s (Muddy tug): Muddy patch of the rainy training field, grey daylight. The dog grabs a wet jute tug and pulls backward, paws slipping a little in the mud, tail wagging. On "out" he lets go and sits in the wet grass. Mud splatters on the handler's rain boots. Sound: rain, wet tug slapping, handler says "out, good". 20-25s (Towel in the car): Open rear hatch of a car parked by the field, rain falling outside, dim grey daylight. The dog sits in the cargo area on a blanket while the owner's hands rub his head and back with a big striped towel. He leans into it. Sound: rain on the car roof, towel rubbing, a happy groan.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
