Chewing Her Favorite Chew Toy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

All about her one true love, a worn rubber chew bone: chewing on the rug, guarding it when I reach, carrying it outside to the deck, chewing upside down and falling asleep with it.

TIMELINE

0-5s	Serious chewing
5-10s	Not sharing
10-15s	Deck move
15-20s	Upside down chew
20-25s	Asleep with it

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. 0-5s (Serious chewing): Living room, afternoon, natural daylight from a side window, worn beige rug. The dog lies on her belly holding a scuffed red rubber chew bone upright between her front paws, chewing on one end with her back teeth, eyes half closed in focus. Sound: rubber squeaking against teeth, steady chewing, quiet room. 5-10s (Not sharing): Same rug, afternoon daylight, a coffee table in the background. The owner's hand slowly reaches toward the chew bone. The dog picks it up, stands, and calmly walks two steps away, then lies back down facing away with the bone tucked under her chin. Sound: owner laughing "okay, okay, it is yours", claws on the rug. 10-15s (Deck move): Back deck, afternoon, overcast daylight, grey weathered boards and a plastic patio chair. The dog trots out through the open back door with the red chew bone in her mouth, drops it on the boards, lies down beside it and starts chewing again. Sound: paws on wood, a thunk as the bone drops, birds and wind. 15-20s (Upside down chew): Back deck, afternoon overcast light, boards warm and dry. The dog rolls onto her back while still holding the chew bone in her front paws above her chest, chewing it at an odd angle with her legs wiggling in the air. Sound: chewing, happy grunts, owner laughs "that is not easier". 20-25s (Asleep with it): Living room in the late afternoon, soft natural light fading, the dog lying on the beige rug. She is asleep on her side with the red chew bone tucked tightly under her chin and one paw resting over it, her lips moving slightly. Sound: soft snoring, clock ticking, owner whispers "never letting go".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Serious chewing

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. Living room, afternoon, natural daylight from a side window, worn beige rug. The dog lies on her belly holding a scuffed red rubber chew bone upright between her front paws, chewing on one end with her back teeth, eyes half closed in focus. Sound: rubber squeaking against teeth, steady chewing, quiet room.

Clip 2 | 5-10s | Not sharing

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
