Snoring on the Sofa

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

She claimed the sofa for an afternoon nap and the snoring is loud: sprawled on her back, lips flapping, paws twitching, ignoring her name and finally waking up with a yawn.

TIMELINE

0-5s	Sofa sprawl
5-10s	Lip flaps
10-15s	Paw twitch
15-20s	Name whisper
20-25s	Wakes up

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. 0-5s (Sofa sprawl): Living room, afternoon, soft natural daylight through half-open blinds, a brown leather sofa with two cushions knocked to the floor. The dog sleeps on her back across the whole sofa, legs bent in the air, head hanging slightly over the armrest. Sound: loud rumbling snore, owner trying not to laugh. 5-10s (Lip flaps): Close view of the dog's face on the brown sofa armrest, afternoon daylight, her mouth loose and upside down. Each snore makes her lips puff out and flap a little, her front teeth showing for a second, nose twitching. A sunbeam crosses the sofa cushion behind her head. Sound: deep snore, lips flapping with each breath. 10-15s (Paw twitch): Living room sofa, afternoon natural light, the dog still on her back. Her front paws fold and twitch in the air, a back leg kicks gently against the cushion, and her tail gives a lazy thump while she stays fast asleep. Sound: snoring, a small whimper, tail thumping leather. 15-20s (Name whisper): Close view on the sofa, afternoon daylight, the dog sleeping with her ears flopped back. The owner whispers her name. One ear swivels toward the sound and her eyebrow lifts, but her eyes stay shut and the snore continues. Then she sighs and sinks deeper into the cushion. Sound: owner whispering her name, one ear rustling, snoring continues. 20-25s (Wakes up): Living room, late afternoon, soft natural light, brown sofa. The dog rolls off her back onto her side, opens her mouth in a huge yawn with a squeak, blinks at the camera, then rolls back over and closes her eyes again. Sound: sofa creaking, a squeaky yawn, owner laughing "good morning".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sofa sprawl

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. Living room, afternoon, soft natural daylight through half-open blinds, a brown leather sofa with two cushions knocked to the floor. The dog sleeps on her back across the whole sofa, legs bent in the air, head hanging slightly over the armrest. Sound: loud rumbling snore, owner trying not to laugh.

Clip 2 | 5-10s | Lip flaps

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
