Road Trip Window Naps

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A long road trip from the back seat: buckled in with her harness seatbelt, sniffing the partly open window, getting sleepy, a full nap and waking up at a stop.

TIMELINE

0-5s	Buckled in
5-10s	Window sniff
10-15s	Getting sleepy
15-20s	Full nap
20-25s	Wakes at stop

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. 0-5s (Buckled in): Back seat of a car, daytime, natural light through the windows, a grey fleece blanket on the seat. The dog sits in a black harness attached to a short seatbelt tether, looking around excitedly as the car starts moving, tail thumping the seat. Sound: engine starting, tail thumping, owner says "road trip". 5-10s (Window sniff): Back seat of a moving car, bright daylight outside, the rear window only open a few inches. The dog in her harness lifts her nose to the gap, nostrils working, ears fluttering slightly in the breeze, while green fields pass in a blur outside. Sound: wind whistling through the gap, road hum, sniffing. 10-15s (Getting sleepy): Back seat of the car, soft afternoon daylight through tinted windows. The dog sits in her harness with heavy eyelids, her head slowly drooping, blinking, then jerking back up, then slowly drooping again toward the blanket until her chin finally rests on the seat. Sound: steady road hum, owner quietly laughing. 15-20s (Full nap): Back seat, dim cloudy daylight through the windows, the window now closed. The dog is curled up asleep on the grey blanket still wearing her buckled harness, chin on her paws, ears relaxed, her side rising and falling with slow breaths. Sound: engine hum, soft snoring, turn signal clicking. 20-25s (Wakes at stop): Back seat of the parked car at a rest stop, flat overcast daylight outside. The engine turns off, the dog lifts her head, ears go up, she stands on the seat in her harness and stretches, then looks at the door with her tail wagging. Sound: engine off, quiet, owner says "potty break, come on".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Buckled in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. Back seat of a car, daytime, natural light through the windows, a grey fleece blanket on the seat. The dog sits in a black harness attached to a short seatbelt tether, looking around excitedly as the car starts moving, tail thumping the seat. Sound: engine starting, tail thumping, owner says "road trip".

Clip 2 | 5-10s | Window sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
