Puppy Learns Her Name

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Short training sessions as the puppy learns to respond to her name: in the kitchen, the hallway, the backyard, with a toy distraction, and a final happy run to the owner.

TIMELINE

0-5s	Kitchen name call
5-10s	Treat reward
10-15s	Hallway practice
15-20s	Toy distraction
20-25s	Happy run

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old female German Shepherd puppy, black and red-tan with fluffy fur, oversized paws and floppy ears that are just starting to stand, wearing a small red collar. 0-5s (Kitchen name call): Kitchen, morning daylight from the window, beige tile floor. The puppy sniffs around the bottom of the fridge with her back to the camera. The owner calls her name in a bright voice, she lifts her head, turns around with her floppy ears flapping and trots toward the camera. Sound: owner calling her name, claws ticking on tile, small happy yip. 5-10s (Treat reward): Same kitchen, morning daylight, beige tile floor. The puppy stops at the owner's feet and sits clumsily, her back legs sliding out to one side. The owner's hand lowers a tiny training treat and she takes it gently, then licks her lips and stares up at the hand for another. Sound: small crunch, owner says "yes, good girl" in a happy voice. 10-15s (Hallway practice): Narrow hallway, afternoon, ordinary ceiling light, wooden floor and shoes lined up by the door. The puppy is chewing a sneaker lace near the door. The owner calls her name from the other end, she drops the lace, looks over and gallops down the hallway with big clumsy paws. Sound: owner calling her name, paws thudding on wood, collar jingling. 15-20s (Toy distraction): Backyard, cloudy afternoon, patchy green grass and a wooden fence. The puppy wrestles a squeaky yellow duck in the grass. The owner calls her name once, she freezes, looks up at the camera with the duck still in her mouth, then trots over carrying it proudly. Sound: squeak of the toy, birds, owner calling her name, owner laughing. 20-25s (Happy run): Same backyard, cloudy afternoon, patchy grass. Camera is low near the ground. The owner calls her name from a few meters away and the puppy runs straight at the camera, ears bouncing, tail wagging hard, and climbs onto the owner's knee, licking the owner's hand. Sound: owner calling her name, panting, owner says "you know your name".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Kitchen name call

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 9-week-old female German Shepherd puppy, black and red-tan with fluffy fur, oversized paws and floppy ears that are just starting to stand, wearing a small red collar. Kitchen, morning daylight from the window, beige tile floor. The puppy sniffs around the bottom of the fridge with her back to the camera. The owner calls her name in a bright voice, she lifts her head, turns around with her floppy ears flapping and trots toward the camera. Sound: owner calling her name, claws ticking on tile, small happy yip.

Clip 2 | 5-10s | Treat reward

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
