Puppy Meets the Grass

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy's first real time on grass: the first careful steps, sniffing a dandelion, pouncing on a leaf, rolling on her back and racing back to the owner.

TIMELINE

0-5s	First careful steps
5-10s	Sniffing dandelion
10-15s	Leaf pounce
15-20s	Rolling on back
20-25s	Racing back

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old female German Shepherd puppy, black and red-tan with fluffy fur, oversized paws and floppy ears that are just starting to stand, wearing a small red collar. 0-5s (First careful steps): Backyard patio edge, mild sunny morning, grey concrete slab meeting short green grass. The puppy stands on the concrete, lifts one big front paw and touches the grass, pulls it back, then slowly steps onto the lawn with all four paws, lifting her feet high like the grass feels strange. Sound: birds chirping, owner laughing softly, "it's just grass". 5-10s (Sniffing dandelion): Same backyard, sunny morning, short grass with a few yellow dandelions. The puppy lowers her nose to a single dandelion, sniffs it carefully, sneezes a tiny sneeze, shakes her head so her floppy ears flap, then sniffs it again with her tail wagging. Sound: tiny sneeze, birds, distant lawn mower. 10-15s (Leaf pounce): Backyard near a wooden fence, sunny morning, green grass with one dry brown leaf moving in a light breeze. The puppy crouches low with her rear end up, watches the leaf, then pounces on it with both front paws and bites at it, then looks up at the camera. Sound: crunching leaf, light breeze, tiny growl. 15-20s (Rolling on back): Middle of the backyard lawn, sunny morning, soft green grass. The puppy flops onto her side, rolls onto her back with her oversized paws in the air and wiggles back and forth, rubbing her back on the grass, mouth open and tongue out, a few grass clippings sticking to her fluffy fur. Sound: grass rustling, little grunts, owner laughing. 20-25s (Racing back): Backyard, sunny morning, camera low near the patio edge looking out across the grass. The owner claps twice and the puppy scrambles up and runs back across the lawn, ears flopping, and bumps into the owner's sneakers, then sits down panting with grass on her nose. Sound: two claps, puppy panting, owner says "you liked it, huh?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First careful steps

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

She was very suspicious of the green carpet at first.
What did your pup think of grass the first time?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
