Her Ears Finally Stood Up

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The ear watch is finally over: her floppy ear bouncing as she runs, head tilts, both ears popping up at a sound, a proud walk and the owner gently touching her upright ears.

TIMELINE

0-5s	Floppy ear trot
5-10s	Head tilt
10-15s	Both ears pop
15-20s	Proud walk
20-25s	Touching her ears

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 6-month-old female German Shepherd, lanky with long legs and oversized ears, one ear still slightly floppy, black and red-tan coat, wearing a faded red nylon collar. 0-5s (Floppy ear trot): Front yard, cool sunny morning, short grass and a concrete path. The dog trots toward the camera along the path, her left ear standing tall and the right ear folded over at the tip, bouncing with every step. She stops and sits in front of the owner. Sound: birds, paws on concrete, owner laughing "one ear up, one ear down". 5-10s (Head tilt): Living room, afternoon, soft daylight from a window, beige couch. The dog sits on the rug facing the camera. The owner makes a squeaky noise off camera and she tilts her head to one side, then to the other, her oversized ears turning toward the sound. Sound: squeaky noise, quiet room, owner giggling. 10-15s (Both ears pop): Kitchen, afternoon, natural daylight, light grey tile floor. The dog lies on the tiles relaxed. A knock sounds at the front door, she lifts her head fast and both ears shoot straight up and stay up, pointing toward the hallway. She holds still, listening. Sound: three knocks on the door, owner whispering "look, both of them". 15-20s (Proud walk): Neighborhood sidewalk, late afternoon, overcast light, parked cars and green hedges. The dog walks beside the owner on a red leash, both ears standing tall and turning toward small sounds, her lanky legs moving in a steady trot and tail relaxed. Sound: traffic in the distance, footsteps, collar jingling. 20-25s (Touching her ears): Back steps of the house, evening, ordinary porch light, wooden steps. The dog sits close to the camera. The owner's hand gently strokes one upright ear from the base to the tip, the ear bends then springs right back up, and the dog leans into the hand and closes her eyes. Sound: crickets, soft fur rustle, owner says "finally, big girl ears".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Floppy ear trot

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 6-month-old female German Shepherd, lanky with long legs and oversized ears, one ear still slightly floppy, black and red-tan coat, wearing a faded red nylon collar. Front yard, cool sunny morning, short grass and a concrete path. The dog trots toward the camera along the path, her left ear standing tall and the right ear folded over at the tip, bouncing with every step. She stops and sits in front of the owner. Sound: birds, paws on concrete, owner laughing "one ear up, one ear down".

Clip 2 | 5-10s | Head tilt

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 6-month-old female German Shepherd, lanky with long legs and oversized ears, one ear still slightly floppy, black and red-tan coat, wearing a faded red nylon collar. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
