### MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female German Shepherd with a black saddle, rich red-tan legs, chest and face, a dark mask around the muzzle, upright ears, a slightly slimmer build, wearing a faded red nylon collar with a small round metal tag, natural slightly messy coat. 0-5s (Rolling snowballs): Backyard covered in fresh snow, cloudy winter morning, bright white light, wooden fence and bare trees. Two kids in puffy jackets push a big snowball across the yard. The dog bounces around them in the snow, nose dusted white, tail wagging. Sound: snow crunching, kids laughing, muffled winter quiet. 5-10s (Catching snow): Same snowy backyard, cloudy winter morning. A boy tosses a small handful of loose snow into the air. The dog jumps up and snaps at it, snow puffing over her face, then lands and digs her nose into the snow looking for it. Sound: snap of her jaws, kids cheering, snow crunching. 10-15s (Snowman sniff): Middle of the snowy backyard, cloudy winter late morning, a finished three-ball snowman with stick arms. The dog walks around it slowly, sniffing the bottom carefully, then stretches up and sniffs a stick arm, her ears forward and her tail wagging slowly behind her. Sound: sniffing, kids giggling, a crow calling. 15-20s (Carrot nose): Same snowman, cloudy winter late morning. A girl pushes a real carrot into the snowman's face. The dog stands on her back legs briefly with front paws on the snowman's belly, sniffs the carrot with great interest, then drops back down. Sound: girl laughing "no, that's his nose", snow crunching. 20-25s (Snow roll): Open part of the snowy backyard, cloudy winter late morning, soft fresh snow. The dog flops onto her back and rolls side to side, legs kicking in the air, snow sticking to her coat, then jumps up and shakes, white flakes flying. Sound: snow crunching, kids laughing, owner says "snow dog".

### AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

## CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

## HOW TO MAKE IT LOOK REAL

| | |
|---|---|
| **Use a real photo** | Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips. |
| **Muse AI: one video** | Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts. |
| **Pick the most natural** | Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face. |
| **Keep the real sound** | Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath. |
| **No filters** | Do not add filters, slow motion or fancy transitions - real home videos don't have them. |
