First Look Through the Shelter Kennel

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first time we saw him at the shelter: spotting him on his cot, eye contact, him coming forward, a first sniff of the owner's hand through the gate, and a kind staff member bringing him out for a visit.

TIMELINE

0-5s	Spotting him
5-10s	Eye contact
10-15s	Coming closer
15-20s	First sniff
20-25s	Out for a visit

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. 0-5s (Spotting him): Clean, quiet shelter kennel hallway, bright even overhead light, smooth grey floor and freshly washed stainless gates. The camera walks along the row and stops at one kennel. Inside, on a raised cot with a soft fleece blanket, the dog lies at the back, watching the camera with cautious eyes and his ears held back. Sound: calm distant barking, soft footsteps, owner whispering "oh, look at him". 5-10s (Eye contact): Same clean kennel, bright overhead light. The camera drops low at the gate as the owner, a woman in her early 30s with dark wavy shoulder-length hair, crouches down. The dog lifts his head off the blanket, tilts it slightly and keeps looking at her, his tail giving one quiet thump against the cot. Sound: a soft thump, fan humming, owner saying "hey, handsome". 10-15s (Coming closer): Same tidy kennel in the shelter, bright even overhead light, stainless gate in front. The dog stands up from the cot, stretches his front legs, and walks forward a few careful steps across the clean floor, stopping a short distance from the gate with his nose working and his tail held low. Sound: claws tapping on the floor, quiet hallway. 15-20s (First sniff): Close at the kennel gate, bright shelter overhead light, shiny stainless bars. The owner's hand rests flat and still near the gate, back of the hand forward. The dog stretches his neck out, sniffs her knuckles through the gap, gives her fingers one small lick and steps back, his ears softening a little. Sound: sniffing, a tiny lick, owner gasping softly. 20-25s (Out for a visit): Shelter hallway, bright overhead light, clean grey floor. A kind staff member, a young man in a plain navy polo and jeans, opens the gate and gently loops a grey slip leash over the dog's head. The dog steps out into the hallway, sniffs the staff member's hand and looks back toward the camera. Sound: gate latch clicking, staff member saying "want to meet them, bud?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Spotting him

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. Clean, quiet shelter kennel hallway, bright even overhead light, smooth grey floor and freshly washed stainless gates. The camera walks along the row and stops at one kennel. Inside, on a raised cot with a soft fleece blanket, the dog lies at the back, watching the camera with cautious eyes and his ears held back. Sound: calm distant barking, soft footsteps, owner whispering "oh, look at him".

Clip 2 | 5-10s | Eye contact

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

I wasn't planning to adopt that day.
Then he looked at me through the kennel gate.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
