First Car Ride to Forever

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first ride in our car: clipped into a padded harness in the back seat, nervous at first, sniffing the cracked window, lying down with his chin on the owner's hand and waking up in our driveway.

TIMELINE

0-5s	Harness clip-in
5-10s	Nervous start
10-15s	Window sniff
15-20s	Lying down
20-25s	Arriving home

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. 0-5s (Harness clip-in): Back seat of a dark green hatchback in a parking lot, overcast daylight through the windows, a grey blanket spread over the seat. The owner's hands fasten a black padded car harness around the dog's chest and clip its short tether to the seat belt buckle. The dog stands still, ears back, watching her hands. Sound: buckle clicking, owner saying "there you go, safe and sound". 5-10s (Nervous start): Inside the moving car, flat grey daylight through the windows, filmed by the owner, a woman in her early 30s with dark wavy shoulder-length hair, turned around in the passenger seat. The dog sits stiffly on the back seat blanket in his harness, panting lightly, eyes moving from window to window. Sound: engine hum, turn signal clicking, partner asking "is he okay back there?". 10-15s (Window sniff): Back seat of the moving car, daytime, grey light, trees passing outside. The rear window is open just a small gap at the top. The dog, held safely by his harness tether, lifts his nose to the gap and sniffs the passing air, nostrils working, ears slowly turning forward. Sound: air rushing through the gap, engine hum, sniffing. 15-20s (Lying down): Back seat of the moving car, steady grey daylight through the windows. The dog turns one small circle on the blanket in his harness and lies down with a sigh, resting his chin on the owner's hand that reaches back between the front seats. Her thumb strokes his muzzle. Sound: a long sigh, engine hum, owner whispering "almost home". 20-25s (Arriving home): The car parked in a short concrete driveway in front of a white house with a small lawn, late afternoon overcast light. In the back seat the dog is dozing on the blanket in his harness. He lifts his head sleepily as the rear door opens and sniffs toward the fresh air outside. Sound: engine turning off, car door opening, birds, owner saying "we're home".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Harness clip-in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. Back seat of a dark green hatchback in a parking lot, overcast daylight through the windows, a grey blanket spread over the seat. The owner's hands fasten a black padded car harness around the dog's chest and clip its short tether to the seat belt buckle. The dog stands still, ears back, watching her hands. Sound: buckle clicking, owner saying "there you go, safe and sound".

Clip 2 | 5-10s | Nervous start

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
