The First Time He Wagged His Tail

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The day his tail finally moved: the owner comes home, he greets her carefully, a tiny wag, a bigger wag, and then a full body wiggle in the living room.

TIMELINE

0-5s	Owner comes home
5-10s	Careful greeting
10-15s	First little wag
15-20s	Bigger wag
20-25s	Full body wiggle

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. 0-5s (Owner comes home): Front hallway of the house, late afternoon daylight from the opening front door, wooden floor, shoes lined along the wall. Point of view of the owner stepping inside. At the far end of the hallway the dog stands up from his blanket, ears back, watching the door carefully. Sound: keys jingling, door opening, owner saying "hi, I'm home". 5-10s (Careful greeting): Same hallway, late afternoon daylight from the door. The dog walks halfway down the hallway toward the camera, stretches his neck and sniffs the owner's jeans and her sneakers one by one. His tail stays low and still behind him. Sound: claws on wood, sniffing, owner saying softly "hey, buddy". 10-15s (First little wag): Close shot in the hallway, same afternoon daylight. The owner's hand reaches down and scratches his chest. Behind him his tail moves side to side in a small, stiff wag, just a few times, and the camera tilts down quickly to catch it. Sound: owner gasping "wait, are you wagging?". 15-20s (Bigger wag): Same hallway with wooden floor. The owner, a woman in her early 30s with dark wavy shoulder-length hair, crouches down and talks to him softly. The dog steps closer and his tail swings wider and looser, sweeping back and forth above the floor. Sound: owner laughing and sniffling, tail brushing the wall. 20-25s (Full body wiggle): Living room right after, afternoon daylight through the window, beige carpet and a grey couch. The dog wiggles his whole back end, circles once around the owner's legs and nudges her hand with his nose, his tail swinging hard enough to thump the couch. Sound: tail thumping the couch, owner saying "look at you!".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Owner comes home

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. Front hallway of the house, late afternoon daylight from the opening front door, wooden floor, shoes lined along the wall. Point of view of the owner stepping inside. At the far end of the hallway the dog stands up from his blanket, ears back, watching the door carefully. Sound: keys jingling, door opening, owner saying "hi, I'm home".

Clip 2 | 5-10s | Careful greeting

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog wiggles his whole back end, circles once around the owner's legs and nudges her hand with his nose, his tail swinging hard enough to thump the couch. Sound: tail thumping the couch, owner saying "look at you!".

FACEBOOK CAPTION

Three weeks. That's how long it took.
I cried over a tail. No regrets.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
