First Walk Without Fear

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The day a walk finally felt good: out the gate with his head up, a relaxed stroll down the street, a car door slam he shrugs off, a long hedge sniff, and trotting home with his tail up.

TIMELINE

0-5s	Out the gate
5-10s	Relaxed stroll
10-15s	Car door slam
15-20s	Hedge sniff
20-25s	Trotting home

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd who was just rescued from a shelter: a little thin with a dull, slightly patchy wolf-grey coat, cautious eyes, ears sometimes held back, wearing a plain grey slip leash and a new dark red leather collar. 0-5s (Out the gate): Front yard of a white house on a crisp autumn morning, cool natural daylight, a low wooden gate and fallen yellow leaves on the path. The owner's hand opens the gate and the dog walks through on his slip leash with his head up and ears forward, without hesitating. Sound: gate creaking, leaves crunching, owner saying "look at you go". 5-10s (Relaxed stroll): Residential sidewalk lined with maple trees, autumn morning light, leaves on the ground. The camera follows the owner, a woman in her early 30s with dark wavy shoulder-length hair in a beige jacket, as the dog walks loosely beside her, sniffing the leaves as he goes. Sound: leaves crunching, birds, footsteps. 10-15s (Car door slam): Same tree-lined street, cool autumn daylight. Across the road a neighbor shuts a car door with a loud thud. The dog flinches and pauses, looks toward the sound for a second, then turns back and keeps walking beside the owner with his tail relaxed. Sound: a car door slamming, owner saying "you're okay, good boy". 15-20s (Hedge sniff): Same quiet street, autumn morning light. The dog stops at a neat green hedge in front of a brick house and sniffs along it with deep interest, his tail wagging slowly, while the owner's hand holds the slip leash loose and waits. Sound: sniffing, leaves rustling, distant dog barking. 20-25s (Trotting home): Same street heading back toward the white house, cool daylight, leaves on the sidewalk. The dog trots a little ahead to the end of the slip leash with his tail held up and ears bouncing, glancing back at the camera as if to hurry the owner along. Sound: quick paws on concrete, owner laughing "okay, okay, home".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

FACEBOOK CAPTION

Two months ago a car door sent him hiding behind my legs.
Today he looked at it and kept walking.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
