Before and After Rescue

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Then and now: in the first two clips he is just rescued, thin and unsure in his first days home; in the last three he is healthy, shiny and confident doing the same things today.

TIMELINE

0-5s	Then: the corner
5-10s	Then: first meals
10-15s	Now: same corner
15-20s	Now: breakfast joy
20-25s	Now: total confidence

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real male short-coat grey sable German Shepherd with a dark face mask, wearing a dark red leather collar, shown at a different age in each clip as the scene describes (younger adult to older, muzzle getting greyer). 0-5s (Then: the corner): In this clip he is just rescued: a little thin, with a dull, slightly patchy coat and a grey slip leash. Living room, afternoon daylight through the window, beige carpet. He stands in the corner by the bookshelf with his ears back and his tail low, watching the camera. Sound: quiet room, owner whispering "it's okay, buddy". 5-10s (Then: first meals): Still just rescued in this clip: thin, coat dull and patchy, grey slip leash on. Kitchen, morning daylight, beige tile floor. He eats cautiously from a steel bowl, stopping to glance up at the camera between bites, his body tense. Sound: slow crunching, fridge humming. 10-15s (Now: same corner): Months later in this clip: healthy and well filled out, with a thick, shiny wolf-grey coat. Same living room, afternoon daylight, beige carpet. He trots past the same bookshelf corner with his tail high and sits in front of the camera, ears tall. Sound: tags jingling, owner saying "same spot, different dog". 15-20s (Now: breakfast joy): Healthy and shiny now in this clip, with a full, glossy coat. Same kitchen, morning daylight, beige tiles. He tap-dances his front paws as the owner's hand lowers his bowl, then digs in happily, tail wagging the whole time, no more glancing up. Sound: paws tapping tile, eager crunching. 20-25s (Now: total confidence): Healthy and shiny in this clip, strong and relaxed. Backyard on a sunny afternoon, green lawn and wooden fence. The owner, a woman in her early 30s with dark wavy shoulder-length hair, calls him and he runs full speed to her, then leans his whole weight against her legs. Sound: paws thudding, owner laughing "there's my boy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Then: the corner

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real male short-coat grey sable German Shepherd with a dark face mask, wearing a dark red leather collar, shown at a different age in each clip as the scene describes (younger adult to older, muzzle getting greyer). In this clip he is just rescued: a little thin, with a dull, slightly patchy coat and a grey slip leash. Living room, afternoon daylight through the window, beige carpet. He stands in the corner by the bookshelf with his ears back and his tail low, watching the camera. Sound: quiet room, owner whispering "it's okay, buddy".

Clip 2 | 5-10s | Then: first meals

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real male short-coat grey sable German Shepherd with a dark face mask, wearing a dark red leather collar, shown at a different age in each clip as the scene describes (younger adult to older, muzzle getting greyer). Still just rescued in this clip: thin, coat dull and patchy, grey slip leash on. Kitchen, morning daylight, beige tile floor. He eats cautiously from a steel bowl, stopping to glance up at the camera between bites, his body tense. Sound: slow crunching, fridge humming.

Clip 3 | 10-15s | Now: same corner

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
