Following Me Up the Stairs Every Night

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The nightly bedtime walk: the owner turns off the lamp, the dog gets up and follows her up the stairs, waits on the landing, settles in the bedroom and gets one last head pat from the bed.

TIMELINE

0-5s	Lamp goes off
5-10s	Up the stairs
10-15s	Waiting on landing
15-20s	Settling by the bed
20-25s	Last head pat

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd with a wolf-grey coat of black-tipped hairs, a darker back and dark face mask, lighter cream-grey legs and chest, upright ears, warm brown eyes, wearing a dark red leather collar with a small brass tag. 0-5s (Lamp goes off): Living room at night lit by a single floor lamp, couch with a crumpled throw. The owner's hand clicks the lamp switch and the room goes dim, lit only by the hallway light. On the couch the dog lifts his head, stretches and hops down. Sound: lamp switch click, couch creaking, a big yawn. 5-10s (Up the stairs): Carpeted staircase at night, small wall light on the landing. Filmed looking back down over the owner's shoulder as she climbs. The dog follows one step behind her heels, climbing steadily, his ears up and eyes on her. Family photos in plain frames line the wall beside the stairs. Sound: soft paw thuds on carpet, creaky step, owner says "come on, bedtime". 10-15s (Waiting on landing): Upstairs landing at night, warm ceiling light, a narrow hallway runner rug. The owner stops to close a linen closet door. The dog sits on the runner and waits patiently, looking up at her, tail sweeping slowly across the rug. Sound: closet door clicking shut, tail brushing the rug. 15-20s (Settling by the bed): Bedroom at night lit by one bedside lamp, grey duvet, wooden nightstand with a glass of water. The dog walks to his round bed on the floor beside her bed, turns in a circle twice and flops down with his back against the bed frame. Sound: bed rustling, a deep sigh, quiet house. 20-25s (Last head pat): Same bedroom, bedside lamp on, view from the owner lying in bed looking down over the edge. Her hand reaches down and rests on the dog's head. He lifts his chin into her palm, licks her wrist once and closes his eyes. Sound: duvet rustling, a soft lick, owner whispers "goodnight, my boy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
